Automakers are as prone to turn out clunkers as politicians are to lie. Their cars may be ugly, misconceived, badly built, diabolical to drive, ridiculously thirsty, or just plain unreliable. So which were the worst of the past 20 years?

This trustworthy guide has step-by-step advice on used cars from selection to shopping strategies, vehicle inspection, negotiation techniques, and closing the deal. Also includes details about all checks performances, and how to find a good mechanic.

This book provides research-oriented care providers with up-to-date information on the oral cancer patient population, the ways in which we are treating them, and the scientific approaches being pursued in order to improve survival and reduce treatment-related morbidity. The text is organized into three sections covering epidemiology and management, cancer development and biomarkers, and breaking developments and novel approaches for drug discovery. The first section includes discussion of the emerging role of HPV in oral cancer and explains the surgical, chemotherapy and radiation approaches to treatment. Aspects such as molecular progression, the role of cancer stem cells in tumor development, and the value of various biomarkers are then examined. The final section is devoted to the latest advances and covers, among other topics, current clinical trials, emerging drug targets, and targeting of the unfolded protein response and of mediators of coagulation.

Drivers buy more wheels and tires for their cars and trucks than any other aftermarket accessory. This book is a comprehensive source for wheel and tire information. Whether you want to know how your wheels and tires actually work and how they affect vehicle performance, or whether you just need advice as to what best suits your vehicle, this book provides the information you are looking for. This book covers daily use and competition cars and trucks, including off-road, circle track, drag, autocross, rally, and show vehicles. Beginning with a chapter on vehicle dynamics, with explanations of center of gravity, slip angle, yaw, roll, and pitch. Author Richard Newton then moves on to general information about tires and wheels--from materials and construction to use and maintenance. He also explores how this general information applies to specific types of vehicles, using pertinent examples throughout.

This book investigates the role of women and labour activism in Asia, demonstrating that women have been active in union and non union based campaigns throughout the region. Although focusing primarily on women, the contributions to this book address issues that affect all workers. Chapters on China, India, Japan, Korea, Indonesia, Malaysia, Sri Lanka, Thailand and Bangladesh examine the part that female labour activism has played inside, and outside, formal union movements. Whilst documenting the peculiar factors characterising individual national contexts, the book emphasises the similarities in women ' s experiences of union and labour activism and the barriers women labour activists have faced. It considers the relationships between women union members and activists and male officials and union members, links with other social movements – particularly the broader women ' s movement – and the details of specific labour campaigns and struggles. In doing so, it provides a full account of the role of women in union activism in Asia, covering all the major economies of the region, and successfully challenging the prevailing conception of Asian women workers as passive and uninterested in industrial issues.

How to Design and Evaluate Research in Education provides a comprehensive introduction to educational research. Step-by-step analysis of real research studies provides students with practical examples of how to prepare their work and read that of others. End-of-chapter problem sheets, comprehensive coverage of data analysis, and information on how to prepare research proposals and reports make it appropriate both for courses that focus on doing research and for those that stress how to read and understand research.
