A comprehensive annual guide for nursing students and practicing nurses, the 2014 Lippincott's Nursing Drug Guide provides quick A-to-Z access to current, vital drug information. This edition includes information on over 1500 drugs and drug combinations. Complete monographs for over 700 common drugs contain generic and trade names, pronunciations, pregnancy risk category, controlled substance schedule (if appropriate), drug classes, therapeutic actions, indications, contraindications and cautions, available forms, dosages, pharmacokinetics, IV facts (if appropriate), adverse effects, interactions, and a nursing considerations section based on nursing process steps including assessment, interventions, and teaching points. The book also includes a 32-page full-color photo guide to pills and capsules for easy reference and multiple additional appendices that summarize key clinical information. The electronic ancillary contains 200 drug monographs and patient-teaching aids.

There is a difference in drug handbooks. From the leading name in nursing, Mosby's 2014 Nursing Drug Reference makes it easy to find the latest and most vital information on the drugs you administer most frequently. More than 5,000 drugs are profiled - including 70 new entries on current drugs and drugs recently approved by the FDA. And no other drug handbook places a higher emphasis on patient safety. With a full-color design and an A to Z organization, this portable reference gives you the most complete information for each drug, including dosing, side effects, interactions, and administration. Updated by nursing pharmacology expert Linda Skidmore-Roth, Mosby's Nursing Drug Reference is a bestseller that has been relied upon by nurses for over 25 years. More than 5,000 generic and trade-name drugs are profiled, covering almost every drug you will administer in practice or in clinicals. Attractive full-color design highlights important information for quick and easy access. Black Box Warnings provide alerts to dangerous or life-threatening adverse reactions. Safety Alert icon identifies situations that require special attention. Common and life-threatening side effects are organized by body system, showing signs to watch for during assessments. Nursing Process steps are used as the framework for organizing all nursing care information. Coverage of IV drug administration highlights dosage and IV administration instructions, including special considerations and Y-site, syringe, and additive compatibilities. Comprehensive drug monographs include generic names, Rx or OTC availability, pronunciations, U.S. and Canadian trade names, functional and chemical classification, controlled-substance schedule, do-not-confuse drugs, action, uses, unlabeled uses, dosages and routes, available forms, side effects, contraindications, precautions, pharmacokinetics, interactions (including drug/herb, drug/food and drug lab test), nursing considerations, and treatment of overdose. Complete pharmacokinetic information includes the mechanism and absorption of the drug as well as its action, duration, and excretion. Flexible, water-resistant cover provides durability in the clinical setting. A companion website includes updates with infrequently used or recently approved drugs, a full-color pill atlas, guidelines to safe handling of chemotherapeutic agents, combination products, drugs metabolized by known P450s, medications to be cautiously for geriatric patients, herbal products, a listing of high-alert Canadian medications and immunization schedules, patient teaching guides in English and Spanish, and more. 70 NEW monographs provide up-to-date content on added or newly released drugs.

Written especially for nurses caring for patients with cancer, the 2014 Oncology Nursing Drug Handbook uniquely expresses drug therapy in terms of the nursing process: nursing diagnoses, etiologies of toxicities, and key points for nursing assessment, intervention, and evaluation. Updated annually, this essential reference provides valuable information on effective symptom management, patient education, and chemotherapy administration. Completely revised and updated, the 2014 Oncology Nursing Drug Handbook includes: \* New chapter on Chemobiotherapy for Noncancer Diseases\* Specific drugs described in terms of their mechanism of action, metabolism, drug interactions, laboratory effects/interference, and special considerations\* The most important and common drug side effects\* Greater discussion of fundamentals of malignant transformation, new molecular targets, and drugs in the pipelineNew drug entries include: enzalutamide, omacetaxine (Synribo), tbo-filgrastim (Netroval), ado-trastuzumab emtansine, aflibercept, bosutinib, cabozantinib, carfilzomib, dabrafenib, pomalidomide, ponatinib, regorafenib, trametinib, abatacept (Orencia), adalimumab (Humira), certolizumab pegol (CIMZA), etanercept (Enbrel), golimumab (Simponi), infliximab (Remicade), tocilizumab (Actemra), and tofacitinib (Xeljanz).

Find complete monographs for more than 900 generic and nearly 3,000 trade drugs—including essential details on 31 NEW drugs—with important nursing considerations for each and every one in the 34th edition of the Nursing2014 Drug Handbook. The best-selling, original drug handbook for nurses features consistently formatted entries for ease of use that focus on the practical information that nurses need. Each monograph consists of generic and trade names, pronunciation key, pregnancy risk category, pharmacologic class, controlled substance schedule (if applicable), available forms & indications and dosages, administration (with drug incompatibilities for I.V. drugs), action (including tables showing route, onset, peak, duration, and half-life), adverse reactions, interactions, nursing considerations, and patient teaching. You can also count on Nursing2014 Drug Handbook to tell you unapproved, off-label drug uses so you'll always know why a drug is prescribed. And, this year, be a more confident nurse with fingertip access to ... • 31 NEW FDA-approved drugs • NEW complete monographs on combination drugs • NEW! 31 new patient-teaching handouts added to the WebToolkit • NEW! safety information: Risk Evaluation and Mitigation Strategies (REMS) • NEW! Indication & Dosage Appendices--Antidotes; Biologics and blood derivatives • Updated therapeutic and pharmacologic class categories With the safeguards you'll find only in the Nursing2014 Drug Handbook, it's easier than ever to stay current on the 3,209 latest

changes to drug information and to avoid even the most common medication errors:
