The Second Edition of Skills-Based Health Education provides pre-service and practicing teachers with the pedagogical foundation and tools to develop a comprehensive PreK-12 health education program using the National Health Education Standards. It takes each standard by grade span, provides scenarios based on research to explain the skill, and then provides a step-by-step approach to planning assessment and instruction. Early chapters connect skills-based health education to coordinated school health and the national initiatives of the Centers for Disease Control and Prevention, Healthy People 2020, The Whole Child, and 21st Century Skills. The remaining chapters provide guidance to plan, implement, and assess performance tasks. Readers are shown how to establish student needs, select content and skill performance indicators to meet those needs, and plan and implement assessment and instructions.

Increasing global competition, combined with shrinking budgets, are forcing managers to find new ways of operating. To compete successfully, companies must now use technology and resources (particularly human resources) to their full potential. Much of the research in the area of performance management has suggested that, while it has great potential to contribute dramatically to the bottom line, it rarely works. The third edition of *Managing Performance Improvement* looks at why performance systems fail, and explores the tools and techniques to overcome this failure. This best selling text provides practical, specific advice to managers and students enabling them to plan for, and then manage, performance improvement.

This bumper book provides lots of practice for the key literacy skills at a bargain price.
