A discipline is a fusion of financial theory (with its origins in economics) and financial analysis (which is linked to accounting). Explores the underlying theories of corporate finance and examines the application of these theories in the Southern African context.

Explores the underlying theories of finance, and examines the practical application of these theories in a southern African environment. The third edition has been restructured and includes additional chapters. Emphasis is placed on the use of computer spreadsheets for solving financial problems.

Now in its seventh edition, Financial Management is the leading text on the theory and application of corporate finance in southern Africa. Set against the backdrop of the world economy, financial crisis, and subsequent developments in financial markets, this new edition makes reference to real-world applications and financial decisions undertaken by South African companies. The seventh edition contains an expanded focus on corporate strategy and financial risk management, and also incorporates all the relevant legislation that affects corporate finance, corporate governance, capital markets, and tax legislation. Additional new topics include: the role of hedge funds, CFDs, the use of put-call parity, behavioral finance, currency swaps, and the application of Section 24J in determining the cost of capital. Many chapters have references to Warren Buffet's views on each topic.

The Practice Standard for Project Risk Management covers risk management as it is applied to single projects only. It does not cover risk in programs or portfolios. This practice standard is consistent with the PMBOK® Guide and is aligned with other PMI practice standards. Different projects, organizations and situations require a variety of approaches to risk management and there are several specific ways to conduct risk management that are in agreement with principles of Project Risk Management as presented in this practice standard.

This book is composed by the papers accepted for presentation and discussion at The 2019 International Conference on Information Technology & Systems (ICITS'20), held at the Universidad Distrital Francisco José de Caldas, in Bogotá, Colombia, on 5th to 7th February 2020. ICIST is a global forum for researchers and practitioners to present and discuss recent findings and innovations, current trends, professional experiences and challenges of modern information technology and systems research, together with their technological development and applications. The main topics covered are: information and knowledge management; organizational models and information systems; software and systems modelling; software systems, architectures, applications and tools; multimedia systems and applications; computer networks, mobility and pervasive systems; intelligent and decision support systems; big data analytics and applications; human-computer interaction; ethics, computers & security; health informatics; information technologies in education.

The TRIPS Agreement is the most comprehensive and influential international treaty on intellectual property rights. It brings intellectual property rules into the framework of the World Trade Organization, obliging all WTO Member States to meet minimum standards of intellectual property protection and enforcement. This has required massive changes in some national laws, particularly in developing countries. This volume provides a detailed legal analysis of the provisions of the TRIPS Agreement, as well as elements to consider their economic implications in different legal and socio-economic contexts. This

book provides an in depth analysis of the principles and of the substantive and enforcement provisions of the TRIPS Agreement, the most influential international treaty on intellectual property currently in force. It discusses the legal context in which the Agreement was negotiated, the objectives of their proponents and the nature of the obligations it created for the members of the World Trade Organization. In particular, it examines the minimum standards that must be implemented with regard to patents, trademarks, industrial designs, geographical indications, copyright and related rights, integrated circuits, trade-secrets and test data for pharmaceutical and agrochemical products. Trade Related Aspects of Intellectual Property Rights: A Commentary on the TRIPS Agreement elaborates on the interpretation of provisions contained in said Agreement, in the light of the customary principles for the interpretation of international law. The analysis -which is supported by a review of the relevant GATT and WTO jurisprudence- identifies the policy space left to such members to implement their obligations in accordance with their own legal systems and public policy objectives, including in respect of complex issues such as patentability criteria, compulsory licenses, exceptions and limitations to copyright, border measures, injunctive relief and the protection of test data under the discipline of unfair competition.

Worldwide, there is a vast but fragile earthen heritage that is barely surviving due to serious damage of the fabric. It is generally believed that natural agents are the overall cause for the decay of earthen heritage. However, when thoroughly evaluating, it can be observed that conservators' interventions have a major impact, which leads to question current approaches to conservation and the reasons why intervention mistakes are repeated and why successful conservation results are still scarce. The research methodology of this investigation is based in a case study strategy analysing three World Heritage earthen sites, namely Chan Chan in Peru, Ait Ben Haddou in Morocco and Arg-e Bam in Iran. A combination of sources was also used, following a multi-method approach. This book suggests implementing standards for high quality intervention through the definition of criteria for decision-making and indicators of quality and best practice, as well as clarification concerning procedures in the methodology of intervention. It also stresses the importance of conservation theory in earthen heritage conservation, combining theory and practice. In addition, the book recommends an overall strategy in the conservation of earthen heritage, with particular emphasis on an approach that integrates education, awareness, research and preventive conservation.

This new Southern African edition of Kim Langfield-Smith and Helen Thorne's best-selling Australian Management Accounting text explains the contemporary role of management accounting in organisations - supporting a company's quest for enhancing shareholder and customer value. The effective management of resources, both financial and non-financial, is essential to creating value. Retaining the strategic approach and comprehensive coverage but thoroughly adapted for Southern Africa, Management Accounting Southern African edition is suitable for the one- or two-semester undergraduate course, and is ideal for use over two years of study.

This book gathers papers from the 23rd International Forum on Advanced Microsystems for Automotive Applications (AMAA 2020) held online from Berlin, Germany, on May 26-27, 2020. Focusing on intelligent system solutions for auto mobility and beyond, it discusses in detail innovations and technologies enabling electrification, automation and diversification, as well as strategies for a better integration of vehicles into the networks of traffic, data and power. Further, the book addresses other relevant topics, including the role of human factors and safety issues in automated driving, solutions for shared mobility, as well as automated bus transport in rural areas. Implications of current circumstances, such as those generated by climate change, on the future development of auto mobility, are also analysed, providing researchers, practitioners and policy makers with an authoritative snapshot of the state-of-the-art, and a source of inspiration for future developments and collaborations.
