Re: Is a Kawasaki TS 650cc. a good jet ski ? the TS is among the slowest watercraft ever made but is very stable and reliable I got one from EBAY a while back for \$300.00 in fair shape but listed as not running I put a 44mm carb I had laying around on it and it has run good since

[Is a Kawasaki TS 650cc. a good jet ski](#)

Up for sale is a 1990 Kawasaki ts 650 jet ski. This machine starts right up, and runs great, needs battery. Only slight, minor corrosion in engine, motor, pump, and other parts. It was only used ocaasionally, on one small, fresh water lake. Motor does not appear to have ever been removed, or apart.Exterior is weathered, but mechanically, starts and runs great.

This volume contains leading edge research and authoritative reviews in meteor science. It provides a comprehensive view of meteoroid research including the dynamics, sources and distribution of these bodies. Techniques for investigation of meteor phenomena in the book include conventional and large aperture radar systems, spacecraft detection, optical systems, spectral measurements, and laboratory based interplanetary dust particle studies.

This volume contains papers presented at the 11th International Conference on Jet Cutting Technology, held at St. Andrews, Scotland, on 8-10 September 1992. Jetting techniques have been successfully applied for many years in the field of cleaning and descaling. Today, however, jet cutting is used in operations as diverse as removing cancerous growths from the human body, decommissioning sunsea installations and disabling explosive munitions. The diversity is reflected in the papers presented at the conference. The papers were divided into several main sections: jetting basics -- materials; jetting basics -- fluid mechanics; mining and quarrying; civil engineering; new developments; petrochem; cleaning and surface treatment; and manufacturing. The high quality of papers presented at the conference has further reinforced its position as the premier event in the field. The volume will be of interest to researchers, developers and manufacturers of systems, equipment users and contractors.
