During the Enlightenment, in a society that was increasingly urbanised and mobile, footwear was an essential item of apparel. This book considers not only the practical but also the symbolic meaning of footwear in France and England during the period from the end of the seventeenth to the mid nineteenth century.

This study of a northern Spanish community shows how the residents of Santa MarÁa del Monte have acted together at critical times to ensure the survival of their traditional forms of social organization. The survival of these forms has allowed the villagers, in turn, to weather demographic, political, and economic crises over the centuries. Originally published in 1991. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

One foot, two feet One mouse, three mice One goose, four geese In this clever counting book, die-cut windows frame a single object and a turn of the page reveals a group. Featuring familiar objects and funny artwork, this inventive concept book is a great introduction to both counting and common irregular plural nouns. A cumulative row of illustrations along the bottom of the pages shows all of the previous objects in order, so kids can keep track of where they are, and the book also contains a fun hide-and-seek game, inviting kids to spy a little airplane zooming through each spread.

You can run from the grave, but you can't hide . . . Half-vampire Cat Crawfield is now Special Agent Cat Crawfield, working for the government to rid the world of the rogue undead. She's still using everything Bones, her sexy and dangerous ex, taught her, but when Cat is targeted for assassination, the only man who can help her is the vampire she left behind. Being around him awakens all her emotions, from the adrenaline kick of slaying vamps side by side to the reckless passion that consumed them. But a price on her head—wanted: dead or half-alive—means her survival depends on teaming up with Bones. And no matter how hard she tries to keep things professional between them, she'll find that desire lasts forever . . . and that Bones won't let her get away again.

Through excerpts from the earliest English language newspapers in Hong Kong, accompanied by Solomon Bard's insightful comments, Voices From the Past provides unique glimpses into Hong Kong's history. Illustrated with interesting photographs, chiefly from the Hong Kong Museum of History's photographic library, the pages bring Hong Kong's colonial past vividly to life. The newspaper excerpts, in chronological order, are faithful to the original text, reproducing its quaint prose and spelling and even occasional errors. Focusing mainly on Hong Kong, the excerpts also touch on Macao, mainland China and the rest of the world. They reflect the changes over the years in language, style of writing, even in humour. Of special interest are the public responses to the many inventions which today we take for granted, such as electric lighting, the motor car, or the first attempts at flying. Most importantly, they reveal the gradual changes in Hong Kong's colonial attitudes as these slowly adjust to the new contemporary values and social and political changes.

A scientist's manifesto addressing a soil loss crisis accelerated by poor conservation practices and climate change This book by celebrated biologist Jo Handelsman lays bare the complex connections among climate change, soil erosion, food and water security, and drug discovery. Humans depend on soil for 95 percent of global food production, yet let it erode at unsustainable rates. In the United States, China, and India, vast tracts of farmland will be barren of topsoil within this century. The combination of intensifying erosion caused by climate change and the increasing food needs of a growing world population is creating a desperate need for solutions to this crisis. Writing for a nonspecialist audience, Jo Handelsman celebrates the capacities of soil and explores the soil-related challenges of the near future. She begins by telling soil's origin story, explains how it erodes and the subsequent repercussions worldwide, and offers solutions. She considers lessons learned from indigenous people who have sustainably farmed the same land for thousands of years, practices developed for large-scale agriculture, and proposals using technology and policy initiatives.

Gerard Philippon is Professor of Bantu Languages at the Institut National des Langues et Civilisations Orientales and is a member of the Dyamique de Langage research team of the Centre National de la Recherche Scientifique, Lyon II University. He has mainly worked on comparative Bantu tonology. Other areas of interest include Afro-Asiatic, general phonology, linguistic classification and its correlation with population genetics.
