In China, one of the first individuals to attempt a multi-dynastic history of the Great Wall was the 17th-century scholar Gu Yanwu. More recently, in the 1930s and 1940s, Wang Guoliang (王國光) and Shou Pengfei (壽彭飛) produced exhaustive studies that culled extant literary records to date and mapped the courses of early border walls. However, these efforts were based solely on written records that contain obscure place names and elusive literary references.

The Carboniferous Period (which began 359 million years ago) is known as the 'golden age of sharks'. An extinction event at the end of the Devonian killed off at least 75% of all species on Earth, including many lineages of fish that once swam the oceans. This allowed sharks to dominate, giving rise to a whole variety of shapes and forms.

The history of the kilt stretches back to at least the end of the 16th century. The kilt first appeared as the belted plaid or great kilt, a full length garment whose upper half could be worn as a cloak draped over the shoulder, or brought up over the head as a hood. The small kilt or walking kilt (similar to the 'modern' kilt) did not develop until the late 17th or early 18th century, and is ...

A Collectors Guide. The idea for an Official History of recent conflicts was first mooted in 1906 with regards to the recent War in South Africa and so with the advent of the Great War the idea was already in the minds of Government to make a detailed record of the current conflict. By late 1915 Battalion diaries were being collected and by the end of the War the ground work had already been laid which enabled the first volumes to appear soon after (Parts of the Munitions History had ...

This vivid, detailed history of World War I presents the general reader with an accurate and readable account of the campaigns and battles, along with brilliant portraits of the leaders and generals of all countries involved. Scrupulously fair, praising and blaming friend and enemy as circumstances demand, this has become established as the classic account of the first world-wide war.

The potato chip has been one of America's favorite snacks since its accidental origin in a nineteenth-century kitchen. Crunch! A History of the Great American Potato Chip tells the story of this crispy, salty treat, from the early sales of locally made chips at corner groceries, county fairs, and cafes to the mass marketing and corporate consolidation of the modern snack food industry. Crunch! also uncovers a dark side of potato chip history, including a federal investigation of the snack food industry in the 1990s following widespread allegations of antitrust activity, illegal buyouts, and predatory pricing. In the wake of these "Great Potato Chip Wars," corporate snack divisions closed and dozens of family-owned companies went bankrupt. Yet, despite consolidation, many small chippers persist into the twenty-first century, as mom-and-pop companies and upstart "boutique" businesses serve both new consumers and markets with strong regional loyalties. Illustrated with images of early snack food paraphernalia and clever packaging from the glory days of American advertising art, Crunch! is an informative tour of large and small business in America and the vicissitudes of popular tastes.

A handsome, lavishly illustrated volume celebrates the human genius for invention from the dawn of civilization to the beginning of the new millennium.

A portrait of world civilization told through the stories of the world's greatest cities from ancient times to the present. Today, for the first time in history, the majority of people in the world live in cities. The implications and challenges associated with this fact are enormous. But how did we get here? From the origins of urbanization in Mesopotamia to the global metropolises of today, great cities have marked the development of human civilization. The Great Cities in History tells their stories, starting with the earliest, from Uruk and Memphis to Jerusalem and Alexandria. Next come the fabulous cities of the first millennium: Damascus and Baghdad, Teotihuacan and Tikal, and Chang'an, capital of Tang Dynasty China. The medieval world saw the rise of powerful cities such as Palermo and Paris in Europe, Benin in Africa, and Angkor in southeast Asia. The last two sections bring us from the early modern world, with Isfahan, Agra, and Amsterdam, to the contemporary city: London and New York, Tokyo and Barcelona, Los Angeles and Sao Paulo. The distinguished contributors, including Jan Morris, Michael D. Coe, Simon Schama, Orlando Figes, Felipe Fernandez-Armesto, Misha Glenny, Susan Toby Evans, and A. N. Wilson, evoke the character of each place|people, art and architecture, government|and explain the reasons for its success.

Caution: this book is a document from the future, on how the United States finally split into two independent republics in 2029, and its aftermath. The topic is so sensitive, that its futuristic author must be identified merely as John Doe, Ph.D. Dateline: 2029. The "One Nation, Indivisible, ....." finally divides. - A political satire.

The New York Times bestselling author of *The Forgotten Man* and *Coolidge* offers a stunning revision of our last great period of idealism, the 1960s, with burning relevance for our contemporary challenges. "Great Society is accurate history that reads like a novel, covering the high hopes and catastrophic missteps of our well-meaning leaders." —Alan Greenspan Today, a battle rages in our country. Many Americans are attracted to socialism and economic redistribution while opponents of those ideas argue for purer capitalism. In the 1960s, Americans sought the same goals many seek now: an end to poverty, higher standards of living for the middle class, a better environment and more access to health care and education. Then, too, we debated socialism and capitalism, public sector reform versus private sector advancement. Time and again, whether under John F. Kennedy, Lyndon Johnson, or Richard Nixon, the country chose the public sector. Yet the targets of our idealism proved elusive. What’s more, Johnson’s and Nixon’s programs shackled millions of families in permanent government dependence. Ironically, Shlaes argues, the costs of entitlement commitments made a half century ago preclude the very reforms that Americans will need in coming decades. In *Great Society*, Shlaes offers a powerful companion to her legendary history of the 1930s, *The Forgotten Man*, and shows that in fact there was scant difference between two presidents we consider opposites: Johnson and Nixon. Just as technocratic military planning by [t]he Best and the Brightest made failure in Vietnam inevitable, so planning by a team of the domestic best and brightest guaranteed fiasco at home. At once history and biography, *Great Society* sketches moving portraits of the characters in this transformative period, from U.S. Presidents to the visionary UAW leader Walter Reuther, the founders of Intel, and Federal Reserve chairmen William McChesney Martin and Arthur Burns. *Great Society* casts new light on other figures too, from Ronald Reagan, then governor of California, to the socialist Michael Harrington and the protest movement leader Tom Hayden. Drawing on her classic economic expertise and deep historical knowledge, Shlaes upends the traditional narrative of the era, providing a damning indictment of the consequences of thoughtless idealism with striking relevance for today. *Great Society* captures a dramatic contest with lessons both dark and bright for our own time.

There are many theories about what caused the Great Depression, and the truth is that there is no simple answer. Rather, a perfect storm of events came together and changed the lives of millions of people. One of the first signs of this dark period was the stock market crash in October 1929. In the aftermath, the country fell into the Great Depression, the longest and most significant economic depression since the Civil War. Through most of the 1920s, the United States economy was growing, and the stock market had reached new highs. People were making money in the stock market and having a grand time, so much so that few noticed the dark clouds forming on the horizon. By the end of the decade, industrial production had begun to decline, while unemployment was steadily rising. Stock market prices were plummeting from their peak in September 1929, and sales reached a crescendo in late October. On October 29, over sixteen million shares were traded in just one day. Billions of dollars were lost, with thousands of investors wiped out, and stock tickers were running hours behind because they were simply unequipped to manage this unprecedented amount of trading. The crash was not the only cause of the Great Depression, but it was certainly a symptom of a larger set of problems. Earlier in 1929, Herbert Hoover won the presidency under a wealth and prosperity platform. He made several unsuccessful attempts to prevent the economy from weakening during his administration. Despite his best efforts, banks continued to fail, and more Americans entered the ranks of unemployment. No one understood the extent of this economic downturn. But the election of 1932 brought Democrat Franklin D. Roosevelt into the White House by a landslide. Roosevelt wasted no time, proposing extensive legislation called the New Deal to create new jobs, revitalize the banks, and give hope to the American people. Some of the New Deal programs were successful, while other fell short; but by the end of the 1930s, things had finally begun to improve. However, it would take the massive spending required during World War II for the economy to return to where it was a decade before. Read about this tumultuous period in American history by purchasing the book *The Great Depression - A Short History*. 30-Minute Book Series Welcome to the eleventh book in the 30-Minute Book Series. Books in this series are fast-paced, accurate, and cover the story in as much detail as a short book possibly can. You can complete each work in less than an hour, which makes our books a perfect companion for your lunch hour or your commute home from work. About the Author Doug West is a retired engineer, small business owner, and an experienced non-fiction writer with several books to his credit. His writing interests are general, with special expertise in science, biographies, and "How To" topics. Doug has a Ph.D. in General Engineering from Oklahoma State University

The first English-language publication of a major history of the Great Lakes region of Africa.

How much do you know about the Aloha State? There's so much to learn about Hawaii that even residents of the state don't know! In this trivia book, you'll learn more about Hawaii's history, pop culture, folklore, sports, and so much more! In *The Great Book of Hawaii*, you'll find the answers to the following questions: How did Hawaii get its name? Why is it called the Aloha State? Why was it once called "The Kingdom of Hawaii"? Which sport was invented in Hawaii? Which movies have been filmed in the state? What legends from the Hawaiian culture haunt the state? What's Hawaii's most famous unsolved mystery? And so much more! As an added bonus, you'll learn words from the Hawaiian language throughout the book. This book is packed with trivia facts about Hawaii. Some of the facts in this book are surprising, while others are sad or creepy. The one thing they have in common is that all of them are interesting! Whether you're just learning about Hawaii or you already think you're an expert on the state, you'll learn something you didn't know in every chapters. Your history teacher will be interesting at all of your newfound knowledge. So, what are you waiting for? Get started to learn more about Hawaii!
