Focusing on the works of Grau, Tyler, and Godwin, Susan S. Kissel shows how these writers portray their white southern women protagonists as “ moving on, ” with their heroines not only renouncing southern patriarchal tradition but actually establishing independent lives and caring communities. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

An eloquent and devastating analysis in comic-book form of our economic world - and what makes us tick. Darryl Cunningham's latest graphic investigation takes us to the heart of free-world politics and the financial crisis, as he traces the roots of our age of selfishness to the rightwing thinkers of the previous century in three fascinating chapters - Ayn Rand, Supercrash, and The Age of Selfishness. He takes a fascinating look at research carried out on the psychological differences between liberals and conservatives and suggests how their traits have defined them.
