African American Children and Mental Health. African American children are at the highest risk for becoming school dropouts, for academic disengagement and failure, and for under- or unemployment. The fundamental issue facing their mental health is educational readiness and academic adjustment, but they also face a higher incidence of health problems including hypertension, and one in three African American children lives in poverty.

~~Why Do Black People ' s Mental Illnesses Get Misdiagnosed?~~

Overall, mental health conditions occur in Black and African American (B/AA) people in America at about the same or less frequency than in White Americans. However, the historical Black and African American experience in America has and continues to be characterized by trauma and violence more often than for their White counterparts and impacts emotional and mental health of both youth and adults.

~~Black and African American Communities and Mental Health ...~~

For many Black communities, discussing mental health can be a difficult subject. For example, one study showed that 63% of African Americans believe that a mental health condition is a personal sign of weakness. This stigma can act as a deterrent from people seeking mental health care when they need it.

Few African American children and youth are in psychiatric inpatient care (Barksdale, Azur, & Leaf, 2009; Chabra, Chaves, Harris, & Shah, 1999; Lindsey et al., 2010), but there are many in residential treatment centers (RTCs) (Firestone, 1990). RTCs provide residential psychiatric treatment similar to that available in hospitals, but they are more likely to be funded from public sources.

How does one go about shifting the psychology of a people whose sense of worth, purpose, and potential have been denigrated and disenfranchised for decades? What specific factors conspire to douse African American children's dreams before they reach adolescence? And what can we learn from African American families determined to help their children beat the odds and succeed? This unique two-volume set examines the forces affecting psychological development and achievement motivation in African American children today. These books address the current political, global, economic, and social contexts as they impact African American families and tackle the tough issues of genes, environment, and race. Experts from leading universities, research institutes, federal agencies, and nonprofit organizations discuss factors such as parenting beliefs and practices, peer influences, school and community environments, racial profiling, race and ethnicity, spirituality, and immigrant status.

This book enumerates the unique challenges, barriers, needs, and trauma of being an African American in the United States, and at the same time highlights what needs to be done to improve and foster the mental health healing of this population. This includes practical applications and strategic solutions that work, such as the family togetherness and ardent spiritual beliefs that form the basis for resilient and vibrant mental health among African Americans. This contributed volume features the authorship of counseling professionals, most of whom are African American themselves. Because of their own personal experiences, they are able to emphasize cogent helping strategies for this population, to show how to move forward with encouragement. The book also highlights ways to promote life that is mentally healthy and holistic for African Americans. Topics covered within the chapters include: Mental Health Challenges Unique to African American Children and Adolescents Diagnosis Issues with African Americans Culture of Family Togetherness, Emotional Resilience, and Spiritual Lifestyles Inherent in African Americans from the Time of Slavery Until Now The Trauma of Being an African American in the 21st Century Training, Recruiting, and Retaining African American Mental Health Professionals African Americans and Mental Health: Practical and Strategic Solutions to Barriers, Needs, and Challenges is an essential resource for helping professionals who work with this population, including psychiatrists, counselors, psychologists, social workers, and other mental health professionals. The book also should be of interest to researchers, instructors, and students in Counseling, Social Work, and Psychology.

Mental Health Care in the African-American Community provides a practical, historical analysis of mental health research, policy, community, environment, and clinical practice as they affect the mental health of African-American individuals throughout the life span.

This handbook fills major gaps in the child and adolescent mental health literature by focusing on the unique challenges and resiliencies of African American youth. It combines a cultural perspective on the

needs of the population with best-practice approaches to interventions. Chapters provide expert insights into sociocultural factors that influence mental health, the prevalence of particular disorders among African American adolescents, ethnically salient assessment and diagnostic methods, and the evidence base for specific models. The information presented in this handbook helps bring the field closer to critical goals: increasing access to treatment, preventing misdiagnosis and over hospitalization, and reducing and ending disparities in research and care. Topics featured in this book include: The epidemiology of mental disorders in African American youth. Culturally relevant diagnosis and assessment of mental illness. Uses of dialectical behavioral therapy and interpersonal therapy. Community approaches to promoting positive mental health and psychosocial well-being. Culturally relevant psychopharmacology. Future directions for the field. The Handbook of Mental Health in African American Youth is a must-have resource for researchers, professors, and graduate students as well as clinicians and related professionals in child and school psychology, public health, family studies, child and adolescent psychiatry, family medicine, and social work.

The linkages between a student ' s health and a student ' s ability to learn have been well established. Children who are sick stay home; and, children at home cannot learn if they are not in school leading to increased dropout rates among other educational outcomes. However, an understanding of this concept is just the beginning of understanding how education and public health are inextricably linked. ? In light of this, Linking Health and Education for African American Students ' Success examines health disparities and education inequities simultaneously and moves beyond a basic understanding of health and education in K-12 school programs. The structural inequalities which lead to reduced academic attainment mirror the social determinants of health. Education is one of the most powerful determinants of health, and disparities in educational achievement as a result of structural inequalities closely track disparities in health. These disparities lead to both sub-standard healthcare and reduced academic attainment among children from underserved minorities in the United States, especially African Americans. ? This book discusses how this may result in children with poorer mental health outcomes; higher school dropout rates; increased risks of arrests and incarceration; higher rates of chronic diseases and mortality; and overall diminished opportunities for success, while providing suggestions as to how to address these issues. This results in an insightful read for researchers, academics and practitioners in the fields of healthcare and education.

In Mental Health among African Americans: Innovations in Research and Practice, Erlanger A. Turner presents a new theoretical framework that emphasizes culturally sensitive clinical practices and Afrocentric values in order to address the lower rates of African Americans seeking medical treatment in the United States.

This unique volume explicitly examines the contemporary status of African American males from adolescence to adulthood, while implicitly challenging how normative masculine identity and historical marginalization complicate individual and familial engagement between social work, social welfare, and African American males.
