Part 1 of the document provides useful background information on harassment. It includes definitions, examples and legal information to assist organisations in understanding the issue and their legal and ethical obligations. Part 2 of the document details the benefits of an anti-harassment policy, provides a policy checklist, a model policy which can be adopted and/or adapted to meet a sport's needs, and strategies for implementing the policy. It also includes some prevention strategies to be applied in addition to the adoption of an anti-harassment policy and procedures. Part 3 of the document deals with harassment complaint procedures and the role of the Harassment Contact Officer and Complaints Officer. It includes model complaint procedures for internal and external complaints. Part 4 answers commonly asked questions concerning harassment and provides some examples relevant to sport. A Glossary of Terms is also included in this section to make understanding of this document easier -optl.

Reveals lesser-known aspects of the stimulus bill while explaining how the Obama administration's progressive steps have prevented an imminent depression while supporting clean energy, health care, education reform, and other positive agendas.

This book, first appearing in German in 2004 under the title Spezielle Relativit stheorie f r Studienanf nger, offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed with as it would only be a burden for the problems to be dealt with. Eventually, a substantial and comprehensive treatise on special relativity emerges which, with its gray-shaded formulary, is an invaluable reference manual for students and scientists alike. Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as the aberration formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-contained and without contradictions.
