concept of Industry 4.0, which presents a considerable challenge for the production and service sectors. While digitization initiatives are usually integrated into the central corporate strategy of larger companies, smaller firms often have problems putting Industry 4.0

File Type PDF Atlas Copco Gx 15 Ff Manual

paradigms into practice. Small and medium-sized enterprises (SMEs) possess neither the human nor financial resources to systematically investigate the potential and risks of introducing Industry 4.0. Addressing this obstacle, the international team of authors focuses on the development

Nils Eikelmann describes the

framework conditions for the application of value-based performance measures and critically analyses selected ones. The disclosure of value-based performance indicators is important in order to demonstrate the successful management of a company and to satisfy the increasing

File Type PDF Atlas Copco Gx 15 Ff Manual

information needs of investors. However, companies adapt the developed theoretical concepts of value-based performance measures to their practical needs and thus investors are no longer able to compare the performance of companies. In addition, there is a

File Type PDF Atlas Copco Gx 15 Ff Manual

variety of different metrics from which companies can choose. The empirical study aims to reduce existing research gaps and is divided into three parts: the analysis of annual reports of selected European companies, the calculation of a standardised value-based performance
