Keeping pace with industry trends and needs across the country, TODAY'S TECHNICIAN:

AUTOMATIC TRANSMISSIONS AND TRANSAXLES, 6e consists of a Classroom Manual that provides easy-to-understand, well-illustrated coverage of theory and a Shop Manual that focuses on practical, NATEF task-oriented service procedures. Taking a technician-oriented focus, the book helps

students master the design, construction, troubleshooting techniques, and procedures necessary for industry careers and provides hands-on practice in using scanners and oscilloscopes to help students develop critical thinking skills, diagnose problems, and make effective repairs. The Sixth Edition offers up-to-date coverage of continuously variable transmissions (CVT), drivelines for front-wheel drive (FWD) and four-wheel drive (4WD) vehicles, and provides the latest information on today's high-tech electronic controls and automatic shifting devices. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This book investigates the role of the Latin language as a vehicle for science and learning from several angles. First, the question what was understood as 'science' through time and how it is named in different languages, especially the Classical ones, is approached. Criteria for what did pass as scientific are found that point to 'science' as a kind of Greek *Denkstil* based on pattern-finding and their unbiased checking. In a second part, a brief diachronic panorama introduces schools of thought and authors who wrote in Latin from antiquity to the present. Latin's heydays in this function are clearly the time between the twelfth and eighteenth centuries. Some niches where it was used longer are examined and reasons sought why Latin finally lost this lead-role. A third part seeks to define the peculiar characteristics of scientific Latin using corpus linguistic approaches. As a result, several types of scientific writing can be identified. The question of how to transfer science from one linguistic medium to another is never far: Latin inherited this role from Greek and is in turn the ancestor of science done in the modern vernaculars. At the end of the study, the importance of Latin science for modern science in English becomes evident.

This monograph, part of a larger study of ways to reduce collateral damage undertaken for the U.S. Air Force, analyzes media and public reactions to civilian casualty incidents, whether these incidents affect media reporting or public support for military operations, and, if so, how. It analyzes case studies of incidents of civilian deaths in the February 1991 bombing of the Al Firdos bunker in the Gulf War, the April and May 1999 attacks on the Djakovica convoy and Chinese embassy during the war in Kosovo, the June 2002 attack involving an Afghan wedding party during operations in Afghanistan, and the March 2003 incident involving a large explosion in a crowded Baghdad marketplace to describe and explain how the U.S. and foreign media and publics have responded. For each case study, the study team examined press, public, and leadership responses to these incidents and found the following. First, while avoiding civilian casualties is important to the American public, it has realistic expectations about the actual possibilities for avoiding casualties. Second, the press reports heavily on civilian casualty incidents. Third, adversaries understand the public's sensitivities to civilian deaths and have sought to exploit them. Fourth, during armed conflict, the belief that the United States and its allies are trying to avoid casualties most affects support for U.S. military operations, both at home and abroad. Fifth, while strong majorities of Americans typically give U.S. military and political leaders the benefit of the doubt when civilian casualty incidents occur, this does not necessarily extend to foreign audiences. Sixth, when civilian casualty incidents occur, it is at least as important to get the story right as to get the story out. Finally, attention to and concern about civilian casualties both at home and abroad have increased in recent years and may continue to do so.

The practitioners of hostile social manipulation employ social media, forgeries, harassment, distribution of rumors, and other tools to cause damage to their target state. This report focuses on the information warfare activities of Russia and China.

This book contains a collection of twenty-one essays in honour of Professor Franco Montanari by eminent specialists on Homer, ancient Homeric scholarship, and the reception of the Homeric Epics in both ancient and modern times. It covers a wide range of important subjects, including neoanalysis and oral poetry, the *Doloneia*, the Homeric scholia, the theoretical premises of Aristarchean scholarship, and Homer in Sappho, Pindar, Comedy, Plato, and Hellenistic Poetry. As a whole, the contributions demonstrate the vitality of modern scholarship on Homeric poetry.

An introduction to the theory and engineering practice that underpins the component design and analysis of radial flow turbocompressors. Drawing upon an extensive theoretical background and years of practical experience, the authors provide descriptions of applications, concepts, component design, analysis tools, performance maps, flow stability, and structural integrity, with illustrative examples. Features wide coverage of all types of radial compressor over many applications unified by the consistent use of dimensional analysis. Discusses the methods needed to analyse the performance, flow, and mechanical integrity that underpin the design of efficient centrifugal compressors with good flow range and stability. Includes explanation of the design of all radial compressor components, including inlet guide vanes, impellers, diffusers, volutes, return channels, de-swirl vanes and side-streams. Suitable as a reference for advanced students of turbomachinery, and a perfect tool for practising mechanical and aerospace engineers already within the field and those just entering it.

A comprehensive overview of the latest developments in world trade, covering the details of merchandise trade by product and trade in commercial services
