Using irreverent wit, an engagingly personal style, and a battery of examples, Chang blasts holes in the "World Is Flat" orthodoxy of Thomas Friedman and other liberal economists who argue that only unfettered capitalism and wide-open international trade can lift struggling nations out of poverty.

It's rare that a book appears with a fresh perspective on world affairs, but renowned economist Ha-Joon Chang has some startlingly original things to say about the future of globalization. In theory, he argues, the world's wealthiest countries and supra-national institutions like the IMF, World Bank and WTO want to see all nations developing into modern industrial societies. In practice, though, those at the top are 'kicking away the ladder' to wealth that they themselves climbed. Why? Self-interest certainly plays a part. But, more often, rich and powerful governments and institutions are actually being 'Bad Samaritans': their intentions are worthy but their simplistic free-market ideology and poor understanding of history leads them to inflict policy errors on others. Chang demonstrates this by contrasting the route to success of economically vibrant countries with the very different route now being dictated to the world's poorer nations. In the course of this, he shows just how muddled the thinking is in such key areas as trade and foreign investment. He shows that the case for privatisation and against state involvement is far from proven. And he explores the ways in which attitudes to national cultures and political ideologies are obscuring clear thinking and creating bad policy. Finally, he argues the case for new strategies for a more prosperous world that may appall the 'Bad Samaritans'.

"Lucid, deeply informed, and enlivened with striking illustrations." -Noam Chomsky One economist has called Ha-Joon Chang "the most exciting thinker our profession has turned out in the past fifteen years." With Bad Samaritans, this provocative scholar bursts into the debate on globalization and economic justice. Using irreverent wit, an engagingly personal style, and a battery of examples, Chang blasts holes in the "World Is Flat" orthodoxy of Thomas Friedman and other liberal economists who argue that only unfettered capitalism and wide-open international trade can lift struggling nations out of poverty. On the contrary, Chang shows, today's economic superpowers-from the U.S. to Britain to his native Korea-all attained prosperity by shameless protectionism and government intervention in industry. We have conveniently forgotten this fact, telling ourselves a fairy tale about the magic of free trade and-via our proxies such as the World Bank, International Monetary Fund, and World Trade Organization-ramming policies that suit ourselves down the throat of the developing world. Unlike typical economists who construct models of how the marketplace should work, Chang examines the past: what has actually happened. His pungently contrarian history demolishes one pillar after another of free-market mythology. We treat patents and copyrights as sacrosanct-but developed our own industries by studiously copying others' technologies. We insist that centrally planned economies stifle growth-but many developing countries had higher GDP growth before they were pressured into deregulating their economies. Both justice and common sense, Chang argues, demand that we reevaluate the policies we force on nations that are struggling to follow in our footsteps.

INTERNATIONAL BESTSELLER "For anyone who wants to understand capitalism not as economists or politicians have pictured it but as it actually operates, this book will be invaluable."-Observer (UK) If you've wondered how we did not see the economic collapse coming, Ha-Joon Chang knows the answer: We didn't ask what they didn't tell us about capitalism. This is a lighthearted book with a serious purpose: to question the assumptions behind the dogma and sheer hype that the dominant school of neoliberal economists-the apostles of the freemarket-have spun since the Age of Reagan. Chang, the author of the international bestseller Bad Samaritans, is one of the world's most respected economists, a voice of sanity-and wit-in the tradition of John Kenneth Galbraith and Joseph Stiglitz. 23 Things They Don't Tell You About Capitalism equips readers with an understanding of how global capitalism works-and doesn't. In his final chapter, "How to Rebuild the World," Chang offers a vision of how we can shape capitalism to humane ends, instead of becoming slaves of the market.

Abby Lacey is now unrecognisable as the wild, tempestuous girl who left Dublin all those years ago to travel the world. Based in Sorrento, she plans fairytale Italian weddings. But only she knows the real reason why she abandoned her travels so abruptly... Lia Lacey, now a glamorous, bestselling novelist, bears no resemblance to the struggling single-mother of her past. Mixing among the glitterati of London's literary crowd, she too has vowed never to return home. But as her troubled daughter, Abby, grows more distant, Lia realises that in order to help her, she must face the one thing she has been running from. Paula Stevens, owner of Dublin's most elite recruitment company, has come a long way from the shy, studious girl of her youth. But can she find the courage to be true to herself?

Economic growth does not demand a secret formula. Good development examples now abound in East Asia and further afield in others parts of Asia, and in Central America. But why then has Africa failed to realise its potential in half a century of independence? Why Africa is Poor demonstrates that Africa is poor not because the world has denied the continent the market and financial means to compete: far from it. It has not been because of aid per se. Nor is African

poverty solely a consequence of poor infrastructure or trade access, or because the necessary development and technical expertise is unavailable internationally. Why then has the continent lagged behind other developing areas when its people work hard and the continent is blessed with abundant natural resources? Stomping across the continent and the developing world in search of the answer, Greg Mills controversially shows that the main reason why Africa's people are poor is because their leaders have made this choice.

The most influential and controversial speeches of Joseph Stiglitz are gathered together for the first time in this volume, with an enlightening commentary by Ha-Joon Chang.

Originally published by Allen Lane, New Delhi, in 2015.

The authors of this book challenge prevailing ideas about free markets and globalization. They question whether globalization is a technological reality that cannot be stopped and ask if the US economy really outperformed its competitors in the 1990s. They show how in each key area--trade and industrial policy, privatization, intellectual property rights, investment and financial policies, exchange rate and currency policy, labour and social welfare --there are alternatives to neoliberal policies that the historical experience of particular countries prove really works.

The latest novel from Nobel Prize winner Toni Morrison. An angry and self-loathing veteran of the Korean War, Frank Money finds himself back in racist America after enduring trauma on the front lines that left him with more than just physical scars. His home--and himself in it--may no longer be as he remembers it, but Frank is shocked out of his crippling apathy by the need to rescue his medically abused younger sister and take her back to the small Georgia town they come from, which he's hated all his life. As Frank revisits the memories from childhood and the war that leave him questioning his sense of self, he discovers a profound courage he thought he could never possess again. A deeply moving novel about an apparently defeated man finding himself--and his home.
