In essays written jointly by specialists on Soviet and German history, the contributors to this book rethink and rework the nature of Stalinism and Nazism and establish a new methodology for viewing their histories that goes well beyond the now-outdated twentieth-century models of totalitarianism, ideology, and personality. Doing the labor of comparison gives us the means to ascertain the historicity of the two extraordinary regimes and the wreckage they have left. With the end of the Cold War and the collapse of the Soviet Union, scholars of Europe are no longer burdened with the political baggage that constricted research and conditioned interpretation and have access to hitherto closed archives. The time is right for a fresh look at the two gigantic dictatorships of the twentieth century and for a return to the original intent of thought on totalitarian regimes - understanding the intertwined trajectories of socialism and nationalism in European and global history.

From the ruins of communism, Boris Groys emerges to provoke our interest in the aesthetic goals pursued with such catastrophic consequences by its founders. Interpreting totalitarian art and literature in the context of cultural history, this brilliant essay likens totalitarian aims to the modernists' goal of producing world-transformative art. In this new edition, Groys revisits the debate that the book has stimulated since its first publication.

This book analyzes the relationship between art and politics in two contrasting modern dictatorships. Through a detailed look at the Chilean and Romanian dictatorships, it compares the different ways in which political regimes convey their view of the world through artistic means. It examines how artists help convey a new understanding of politics and political action during repressive regimes that are inspired by either communism or anti-communism (neoliberalism, traditionalist, conservative). This book demonstrates how artistic renderings of life during dictatorships are similar in more than one respect, and how art can help better grasp the similarities of these regimes. It reveals how dictatorships use art to symbolically construct their power, which artists

can consolidate by lending their support, or deconstruct through different forms of artistic resistance.

Why does the mass killing of civilians persist? Why do the perpetrators often escape criticism and punishment despite violating our most deeply held moral beliefs? Is the protection of civilians from these heinous crimes strengthening or weakening? Examining dozens of episodes of mass killing perpetrated by states since the French Revolution, this book argues that the principle that civilians ought not be deliberately killed has been engaged in a protracted struggle against a variety of 'anti-civilian ideologies' which try to justify such killing. The book argues that although civilian immunity has won the battle of ideas against these ideologies, the battle itself continues as new ideologies emerge and the practice of condemning and punishing perpetrators is uneven and inconsistent - complicated by the politics of each new situation. As a result, whilst it has become much more difficult for states to get away with mass murder, it is still not entirely impossible for them to do so.

The internationally distinguished contributors to this landmark volume represent a variety of approaches to the Nazi and Stalinist regimes. These far-reaching essays provide the raw materials towards a comparative analysis and offer the means to deepen and extend research in the field. The first section highlights similarities and differences in the leadership cults at the heart of the dictatorships. The second section moves to the 'war machines' engaged in the titanic clash of the regimes between 1941 and 1945. A final section surveys the shifting interpretations of successor societies as they have faced up to the legacy of the past. Combined, the essays presented here offer unique perspectives on the most violent and inhumane epoch in modern European history.

Collects and analyzes seventy years of communist crimes that offer details on Kim Sung's Korea, Vietnam under "Uncle Ho," and Cuba under Castro.

WINNER OF THE NEW YORK PUBLIC LIBRARY'S HELEN BERNSTEIN BOOK AWARD NAMED A BEST BOOK OF 2017 BY THE NEW YORK TIMES BOOK REVIEW, LOS ANGELES TIMES, WASHINGTON POST, BOSTON GLOBE, SEATTLE TIMES, CHRISTIAN SCIENCE MONITOR, NEWSWEEK, PASTE, and POP SUGAR
The essential journalist and bestselling biographer of Vladimir Putin reveals how, in the space of a generation, Russia surrendered to a more virulent and invincible new strain of autocracy. Award-winning journalist Masha Gessen's understanding of the events and forces that have wracked Russia in recent times is unparalleled. In *The Future Is History*, Gessen follows the lives of four people born at what promised to be the dawn of democracy. Each of them came of age with unprecedented expectations, some as the children and grandchildren of the very architects of the new Russia, each with newfound aspirations of their own--as entrepreneurs, activists, thinkers, and writers, sexual and social beings. Gessen charts their paths against the machinations of the regime that would crush them all, and against the war it waged on understanding itself, which ensured the unobstructed reemergence of the old Soviet order in the form of today's terrifying and seemingly unstoppable mafia state. Powerful and urgent, *The Future Is History* is a cautionary tale for our time and for all time.

In this volume Europe's leading modern historians offer new insights into two totalitarian regimes of the twentieth century that have profoundly affected world history? Nazi Germany and the Stalinist Soviet Union. Until now historians have paid more attention to the similarities between these two regimes

than to their differences. *Stalinism and Nazism* explores the difficult relationship between the history and memory of the traumas inflicted by Nazi and Soviet occupation in several Eastern European countries in the twentieth century. The first part of the volume explores the origins, nature, and organization of Hitler's and Stalin's dictatorial power, the manipulation of violence by the state systems, and the comparative power of the dictator's personal will and the encompassing totalitarian system. The second part examines the legacies of the Nazi and Stalinist regimes in Eastern European countries that experienced both. *Stalinism and Nazism* features the latest critical perspectives on two of the most influential and deadly political regimes in modern history.

This volume engages the unseen impacts of religion-linked conflicts and successful peacebuilding around the world. The authors address the paradoxes of the role of religion in global conflicts to reveal the connections among religion, conflict, and peace.
