Lesson Planning Blocks are a great way to prepare lesson plans. Especially if you are a visual person. They really make teacher observations a lot less stressful. It's like having a visual checklist. The concept is simple. Each block represents a block of time ranging from 5 to 60 minutes. In each block you write what you will be doing during that block of time of your lesson.

Across the country educators are facing the challenge of restructuring the secondary school to meet the needs of students in the twenty-first century. Block scheduling provides sustained time and fosters an environment for active and experiential learning, a key to student success in life. The author, who has spearheaded the adoption of block scheduling in her school's library media center, has prepared a complete guide for library media specialists contemplating or moving to block scheduling. In preparing this guide she has incorporated the experiences of twelve secondary school libraries across the country that have also moved to block scheduling. Step by step, this guide walks the library media specialist through planning, networking, curriculum and instruction, professional development, technology, and assessment. Practical suggestions, forms, lesson plans, and case studies of other media centers that have successfully adopted block scheduling will help the library media specialist to make the transition to the block. Block scheduling places a high demand on staff, materials, and information technologies. Shaw stresses that networking of people and resources is essential to successful adoption of block scheduling. She takes the reader through the planning and transitional phases of a high school adopting block scheduling and addresses concerns about instructional change, ongoing curriculum, and the role of the library media specialist as a teacher of information technology. She provides ideas on where to find professional development and how to network with other library media specialists with expertise in the block and offers practical suggestions on resource sharing, study hall, flexible scheduling, budget, collection development, substitute teachers, and assessment techniques.

standards. The second edition of this foundational text uses a holistic approach to dance pedagogy for teaching children through adults in school and community environments. It also introduces theories from multiple disciplines and helps students apply those theories and processes when creating lesson and unit plans. New Material Dance Teaching Methods and Curriculum Design offers much new material: Four new sample dance units (up from 10 in the previous edition) Many useful instructor ancillaries, including an instructor guide, a presentation package, and a test package; students can submit their work electronically, and quizzes are automatically graded Resources delivered on HKPropel, including a variety of projects, printable forms, and video clips that demonstrate selected steps, movements, exercises, and combinations of different dance forms Beyond Technique assignments, which have been field tested in university courses, to help students see firsthand what a dance teacher does The sample dance units offer a comprehensive guide for teaching popular dance forms, and they now cover a greater diversity of styles, including hip-hop, Mexican folkloric, African, and line dance. In addition, the new ancillaries offer scope and sequence plans and block time plans for all 14 dance units, as well as all printable forms from the book. Dance Portfolio Another great feature of the book is the dance portfolio that students will create as they work through the text. This portfolio will help them demonstrate their ability to create lesson plans, a unit plan, and a complete dance curriculum. The students will develop these abilities as they complete chapters 1 through 13. Chapter 14 then walks students through assembling the sections of the portfolio. Projects the student can complete to include within their portfolio are available on HKPropel. Step-by-Step Approach Dance Teaching Methods and Curriculum Design offers students a step-by-step course of study for how to teach dance and create sustainable dance programs in

schools. The authors synthesize a wide variety of research and resources to support dance pedagogy and curriculum development, provide the infrastructure to meet the changing needs of students to teach dance in the 21st century, and supply extensive references for students to use to increase their dance education knowledge. Book Organization The text is organized into three parts. Part I covers information specific to teaching dance and understanding learners from grades preK through 12. Part II focuses on applying the dance knowledge gained from part I to the teaching and learning process in the four categories of dance forms. In part III, students learn how to develop unit plans and choose a curriculum design for their dance programs. Filling a Void Dance Teaching Methods and Curriculum Design, Second Edition, addresses the knowledge, skills, processes, and content that students need as they prepare to teach dance in various settings. This text fills a void in dance education literature, studying all the steps as it provides students the foundational knowledge and practical know-how they need to confidently begin teaching dance in schools, recreation programs, or private dance studios.
