A top behavioral geneticist makes the case that DNA inherited from our parents at the moment of conception can predict our psychological strengths and weaknesses. In Blueprint, behavioral geneticist Robert Plomin describes how the DNA revolution has made DNA personal by giving us the power to predict our psychological strengths and weaknesses from birth. A century of genetic research shows that DNA differences inherited from our parents are the consistent, life-long sources of our psychological individuality—the blueprint that makes us who we are. This, says Plomin, is a game changer. Plomin has been working on these issues for almost fifty years, conducting longitudinal studies of twins and adoptees. He reports that genetics explains more of the psychological differences among people than all other factors combined. Genetics accounts for fifty percent of psychological differences—not just mental health and school achievement but all psychological traits, from personality to intellectual abilities. Nature, not nurture is what makes us who we are. Plomin explores the implications of this, drawing some provocative conclusions—among them that parenting styles don't really affect children's outcomes acc genetics is taken into effect. Neither tiger mothers nor attachment parenting affects children's ability to get into Harvard. After describing why DNA matters, Plomin explains what DNA does, offering readers a unique insider's view of the exciting synergies that came from combining genetics and psychology.

The problem? Most small business owners aren't writers, have never written a book before, are time poor and don't know where to start. While many want to write a book, they worry about investing months of their time and thousands of their dollars to write something that isn't any good, or to not even finish. Book Blueprint gives a step-by-step framework that any entrepreneur can follow to write a great book quickly, even if they're not a writer.

- Is University a Waste of Time? And what makes students successful at university? - Why do certain students achieve better results? And why are some more prone to be successful? Axel Gossart has spent his time at university answering these questions. He's observed why certain university students achieve better results than others, what habits and methods shape their success and how their mindset reflects in their results. In this book, Gossart takes a step-by-step journey of a student from a mindset of failure to one of complete success. If you've ever wondered how to become a successful student, First Class Blueprint explains the successful methods that have helped Gossart journey from a failing first year to a successful student in less than 3 months, and how to make your journey a success too.
