Through counterfactual experiments, we study the housing boom-bust around the Great Recession, with three main results. First, the main driver of movements in house prices and rents was a shift in beliefs, not a change in credit conditions. Second, the boom-bust in house prices explains half of the corresponding swings in nondurable expenditures through a wealth effect.

As they do so, they help us understand why bubbles happen, and why some have catastrophic economic, social and political consequences whilst others have actually benefited society. They reveal that bubbles start when investors and speculators react to new technology or political initiatives, showing that our ability to predict future bubbles will ultimately come down to being able to predict these sparks.

Baby Boomer Bust? examines and analyzes the meltdown of 2008/2009 from economic, political and social perspectives and illuminates how the meltdown has directly impacted Baby Boomers -- once known as the generation of promise, but now the generation of panic. It examines the downturns impact on Boomers lifestyles, dreams, aspirations and future plans. Baby Boomer Bust? raises some provocative questions regarding the generations ability to survive the worst economic downturn since the Great Depression..

Seventy-six million Baby Boomers are careening toward retirement in the United States. Demographic shifts toward aging populations are taking place around the Western world, as a variety of factors--biological, technological, medical, and sociocultural--are extending life spans. Meanwhile, birth rates are declining. The scaremongers argue that this generational shift is going to be disastrous: It will result in skyrocketing tax rates, lower retirement and health benefits, higher inflation, increased unemployment and poverty, political instability, and a host of other societal ills. But will it? In Boomer Bust?, Robert Hudson assembles leading authors from fields such as economics, political science, and finance to separate fact from fiction, highlight the terms of debate, and showcase innovative policies that will prevent disaster from occurring. From topics like Social Security to older people rejoining the workforce to the elderly as a political lobby, this two-volume set covers the gamut of economic, political, financial, and business issues related to aging. The Boomer generation will leave one of the largest footprints the world has yet seen. In retirement, as in all else, this generation is blazing a path affecting succeeding generations profoundly. Boomer Bust? charts a path through the thicket of personal and public policy choices facing not just Baby Boomers but all of society.

The dominant cultural script is that the Baby Boomers have 'had it all', thereby depriving younger generations of the opportunity to create a life for themselves. Bristow provides a critical account of this discourse by locating the problematisation of the Baby Boomers within a wider ambivalence about the legacy of the Sixties.

Because researchers often treat baby boomers of color as belonging to one group, quality data on the individual status of specific racial populations is lacking, leading to insufficiently designed programs, policies, and services. The absence of data is a testament to the invisibility of baby boomers of color in society and deeply affects the practice of social work and other helping professions that require culturally sensitive approaches. Melvin Delgado rectifies this injustice by providing a comprehensive portrait of the status and unique assets of boomers of color. Using specific data, he grounds an understanding of boomers ' financial, medical, and emotional needs within a historical, socioeconomic, cultural, and political context, resulting in tailored recommendations for meeting the challenges of a growing population. His research focuses on African American, Hispanic, Asian/Pacific Islander, and Native American older adults and addresses issues of financial security, employment stability, housing, and health care, which are often complicated by linguistic and cultural differences. Rather than treat baby boomers of color as a financial burden on society and its resources, Delgado recognizes their strengths and positive contributions to families and communities, resulting in an affirming and empowering approach to service.

A Wall Street Journal columnist delivers a brilliant narrative of the mugging of the millennial generation-- how the Baby Boomers have stolen the millennials' future in order to ensure themselves a comfortable present The Theft of a Decade is a contrarian, revelatory analysis of how one generation pulled the rug out from under another, and the myriad consequences that has set in store for all of us. The millennial generation was the unfortunate victim of several generations of economic theories that made life harder for them than it was for their grandparents. Then came the crash of 2008, and the Boomer generation's reaction to it was brutal: politicians and policy makers made deliberate decisions that favored the interests of the Boomer generation over their heirs, the most egregious being over the use of monetary policy, fiscal policy and regulation. For the first time in recent history, policy makers gave up on investing for the future and instead mortgaged that future to pay for the ugly economic sins of the present. This book describes a new economic crisis, a sinister tectonic shift that is stealing a generation's future.

A new era of political power has arrived, one in which the social media forces of Facebook, YouTube and Twitter indisputably play a larger role in the political process. This new and updated edition of The Manship School Guide to Political Communication, edited by David Perlmutter and Robert Mann, discusses technological changes in the context of studies and techniques that remain unchallenged, resulting in a truly comprehensive manual to the world of political communication.

This book offers an expert examination of the ideology and motives behind the privatization or the nationalization of an industry, based on real case studies. • Nine case studies of privatization in a variety of contexts: cigarette and alcohol sales, oil production, port facilities, public transportation, prison management, and lotteries • Charts and figures for production and costs throughout each case study • A bibliography for each case study, as well as a comprehensive bibliography for the entire book • A comprehensive index of all topics, firms, policymakers, and important terminology

In "The New Retirement," global economic strategist Sherry Cooper explains that the boomer generation will be reaching traditional retirement age very soon and the enormous wave of boomer retirees will crest in 2025. This phenomenon will profoundly affect the labour markets, the economy, and financial markets for decades. But will boomers retire the way their parents did? Will they work longer and transition gradually into semi-retirement? Cooper tells us that boomers will redefine retirement with great energy and creativity, working well beyond age 65 and mostly by choice. With the dramatic rise in their longevity, healthy goal-driven boomers will seek purposeful leisure--focusing on regeneration, rejuvenation, and low-stress contributions to society and their own personal wealth. Follow Cooper through her own journey to discover the route to financial security in this engaging and insightful read. Learn how the new retirement is about living well while achieving both monetary security "and" your personal goals. "The New Retirement" is an indispensable roadmap to the best years of your life.
