Trading can be a profitable endeavor, but only if you know when to buy and sell. In this guide I will share with you my secret buy and sell signals for trading that have made me significant profits. These signals have been proven to be very profitable over time and you'll be able to make money no matter which way the market moves. Once you know when to buy and sell, you can take advantage of market moves to make money. That's what day trading is all about - making money off of short-term market movements. First we need to cover the basics of how to use buy and sell signals in a trading strategy, and then we'll get into the actual signals themselves. As a trader, it is important to have a clear understanding of what constitutes a buy or sell signal. There are various technical indicators that can be used to generate buy and sell signals. Some common examples include moving averages, Bollinger Bands, and RSI (relative strength index). When using indicators to generate signals, it is important to use multiple indicators to confirm each other. For example, if the moving average crossover indicates a buy signal, wait for the RSI to also indicate oversold conditions before making a trade. This will help ensure that the signal is more reliable. When day trading, it is important to have a clear strategy. This means knowing what signals you will look for in order to make a trade. It is also important to have strict risk management rules in place. This will help you minimize losses and maximize profits. Here are some examples of how you could use buy and sell signals in your day trading strategy: ? -If the moving average crossover indicates a buy signal, wait for the RSI to confirm oversold conditions before making a trade. -If the MACD histogram indicates a buy signal, wait for price to break above the resistance level before making a trade. -If the stochastic oscillator indicates a sell signal, wait for price to break below the support level before making a trade. By following these simple steps, you can develop a profitable day trading strategy using buy and sell signals.

THIS BOOK IS PROBABLY THE MOST HONEST BOOK YOU WILL FIND ON FOREX TRADING This book is for: - Small traders who are already into Forex trading but finding it difficult to make money and may be losing money -Those who want to enter Forex trading but don't know how to manage it with a small account -Those who had tried Forex trading before but already quit after getting loses I have not wasted a single page of this book by writing unnecessary theories and presenting confusing technical analysis because I have read many books myself and most of them contained too much theories and technical analysis and after reading such books, I found myself to be more confused about what to do and how to do. Thus, I have simplified the things for my readers. No matter, if you are already in trading, already out of trading or want to be in trading, this book will guide you exactly what to do and how to do. I have only given those strategies which are tried and tested and for each strategy you will find exact entry points, take profit and stop loss levels. Logical explanation for each strategy has also been given. Real-time examples are given for each strategy so you can understand clearly. For most of the strategies, color charts are also given for your easy understanding. SO YOU CAN NOW GENERATE YOUR OWN BUY AND SELL SIGNALS. ALL THE CHARTS SHOWN IN THE BOOK, TO PROVE THE STRATEGIES, ARE REAL TIME CHARTS FROM LATEST DATES AND YOU CAN VERIFY THESE IN THE CHARTS OF YOUR MT4 OR MT5. The intention of writing this book is to give you the clear picture and not to show you any dreams which I already know cannot be fulfilled. I have been trading since last 12 years. I have seen many ups and downs with Forex trading and finally found a way to survive. In the beginning I lost money.....never made a penny in the first year but intelligently I was putting little money at stake. Reason is that I wanted to get the insight about Forex trading and I really believed that the experience which I will obtain by blowing away \$500 will be the same for \$10000 so why use bigger amount to get the insight. This book is basically for small traders who are already into Forex trading or want to start Forex trading with a small amount to generate some extra income but have no knowledge of technical charts. Instead of generating their own buy/sell signals, they depend of the brokers to provide them the signals. With all my experience, I can assure you this it is never going to work this way. The signals which you will receive from the Forex broker will definitely

help you in earning a dollar in one trade but at the same time will rip you off 100 dollars in another trade. Forex brokers are smart and very calculative but I don't blame them because this is what their business is. Your loss is their profit so they are doing what any other business would do. So, you are the only one who can save yourself from losses. Various sources are available in the market for trading signals: -Brokers send you signals if you are their client -You can buy trade signals from various sites on monthly or yearly subscriptions -Copy trading where they give you access to live trading room and you can copy their trades I am not against any of these but after all my experience in Forex trading, I realized that it's best that you must be able to generate your own signals which will give you a logical satisfaction that you are putting the trade in the right direction. With the knowledge you will gain from this book, even if you use the signals from the brokers, or buy signals from various sites or copy trading, you will be absolutely able to analyze these yourself for accuracy rather than using these blindly and falling in the trap. It is a win-win situation for YOU. PRICE OF THIS BOOK IS ON THE BASIS OF THE QUALITY INFORMATION AVAILABLE IN THIS BOOK.
