Strategy is a central part of the planning function in P-O-L-C. Strategy is also about making choices that provide the organization with some measure of a sustainable competitive advantage.

New coverage on environmental concerns and emerging technologies as well as examples and cases from Australia, New Zealand and Asia-Pacific serve to engage students while updated international content demonstrates how strategic management is used in the global economy. Recognising the importance of relating theory to practice, Strategic Management: Competitiveness and Globalisation 4e provides 13 new case studies and a raft of online cases supported by a case matrix.

Current examples and high interest real-time cases, largely drawn from The Wall Street Journal and Financial Times, illustrate the key role of strategic management in the United States and around the world.
