Flowing among the beautiful mountains and valleys of Virginia and North Carolina, the 469-mile-long Blue Ridge Parkway is a true American jewel. Built to expose motorists to nature as well as to preserve its beauty, the Parkway still delivers unrivaled beauty today. Guide to the Blue Ridge Parkway is filled with information useful to those traveling the Parkway and is detailed with color photographs throughout. It highlights the many significant points of interest located on and nearby the Parkway, including Mount Mitchell, the highest point east of the Mississippi, Moses H. Cone Memorial Park, and Mabry Mill, one of the most photographed sites on the Parkway. Also noted are locations of overlooks, waterfalls, and tunnels as well as key entry and exit points along the Parkway. The guide features a brief history of the Parkway itself, a look at the surrounding geology and human history of the area, and an extensive wildflower bloom calendar. The book is organized mile-post to mile-post, appropriate for travelers who are driving the entire Blue Ridge Parkway or only a small section.

Four important factors have shaped the forests of Great Smoky Mountains National Park, the world's stellar example of southern Appalachian forests. These factors are elevation, landform, forest succession and exotic tree pests. This book explains how to identify and understand the Park's forests based these factors. Elevation and landform are defined and summarized in the Forest Finder, a graphical representation of the 15 major southern Appalachian forest types found in the Park. You can use the Forest Finder to identify forests when you visit Great Smoky Mountains National Park and surrounding national forests. Each forest type is described in detail, as are most of the major trees of the southern Appalachians. Also included are instructions on downloading and interpreting free topographic maps that contain the elevation and land shape information used as inputs to the Forest Finder. Southern Appalachian forest succession is clearly explained, and the reader is shown how to interpret changes in forest succession brought about by land clearing and logging operations in the Park. The associated tree table shows shade tolerance ratings, canopy position and moisture preference for major southern Appalachian trees and shrubs. Important exotic tree pests are described, including the chestnut blight and the hemlock wooly adelgid, as well as their drastic effect on the Park's forests. Along the way the reader learns how to sample the forest using skills like pacing, measuring tree diameter, estimating tree age, determining successional stage and identifying major southern Appalachian tree species. The book directs readers to a web site where free large scale, full color versions of all maps and graphs in the book can be downloaded.

A Study Guide for Charles Frazier's "Cold Mountain," excerpted from Gale's acclaimed Novels for Students.This concise study guide includes plot summary; character analysis; author biography; study questions; historical context; suggestions for further reading; and much more. For any literature project, trust Novels for Students for all of your research needs.

Liberia Country Study Guide - Strategic Information and Developments

Looks at the history of the American chestnut tree and how it was left on the brink of extinction from a plague and the quest to save the tree.

ACCREDITED CAMPS ONLY! Over 2,100 listed. The only directory where camps earn accreditation before being listed. A mere 1/4 of all camps in the U.S.A. are accredited. These camps have met or exceed nationally recognized standards of safety, program quality, staffing & healthcare. When you choose a camp from this GUIDE, you can be certain that 300+ important questions have already been asked & answered in ways that show the camp cares. Each camp's listing includes summer & winter addresses, sponsoring agency, director's name, fee ranges, session lengths, age groups, boy/girl/coed, ten primary activities offered, & camp special comments. Alpha by state. Camps for all budgets & interests. Indexes list camps by 50 activities & by 20 special groups served. Activities include: archery, academics, backpacking, caving, ceramics, sports, aquatics, music, horseback. Special programs listed: cancer, diabetes, learning disabilities, single adults, seniors, youth at risk, gifted. Great for teachers & other youth service professionals seeking alternative employment. Also look for great tid-bits to help know when a child or parent is ready for camp, questions to ask the camp director, how to pack, & how to combat homesickness. Order from: American Camping Association, 5000 State Road 67, North, Martinsville, IN 46151-7902, 800-428-2267 or Independent Publishers Group, 1-800-888-4741. Look for 1997-1998 edition coming in January 1997 (0-87603-153-X).

The Great Smoky Mountains National Park is one of America's most beautiful and popular national parks. Located in the southern Appalachian Mountains of Tennessee and North Carolina, it is home to more than 100,000 species of plants and animals. The grandeur and sheer scale of the park has been captured in Donald W. Linzey's new book, Natural History Guide to the Great Smoky Mountains National Park. It is the most extensive volume available on the park's natural history. Written from the perspective of a naturalist who has spent over fifty years conducting research in the park, this volume not only discusses the park's plant and animal life but also explores the impact that civilization has played in altering the area's landscape. Linzey, who has been a major contributor to the All Taxa Biodiversity Inventory, a concentrated effort to identify every species of plant and animal living within the park, draws from this deep reservoir of research. His book provides a thorough overview of everything a visitor to the park would need to know, without complex jargon. Both casual readers and those more interested in the ecology of the Great Smoky Mountains will find this book an enlightening and educational guide. Donald W. Linzey, a wildlife biologist and ecologist, is professor of biology at Wytheville Community College in Wytheville, Virginia. He is an authority on the mammals of the Great Smoky Mountains National Park and its environs.
