A lively portrait of the “Steel City” and its millionaires and workers during the late nineteenth century. Steel portrays the growth of iron and steel in smoke-filled Pittsburgh during America’s industrial age, and what it meant for the people who lived there. This history shares the fast-paced saga of millionaire barons Andrew Carnegie, Ben Franklin Jones, Henry Clay Frick, Henry Phipps, and Charles Schwab, who often plotted and schemed against each other—as well as the story of the underpaid and undervalued immigrant workforce whose desire to unionize united their bosses against them. Here, author Dale Richard Perelman recounts this dramatic struggle and the bloody battles it spawned throughout Western Pennsylvania’s plants, mines, and railroad yards.

Scuba Exceptional is the perfect sequel to Simon Pridmore's *Scuba Confidential - An Insider's Guide to Becoming a Better Diver*. It reflects the same philosophy of safe diving through the acquisition of knowledge and skills. The themes are new, there are some wonderful and extremely useful new cautionary tales and the focus this time is more on issues that face experienced divers. For example, there is more technical diving content but, as usual, Simon covers complex issues in his usual clear and easy-to-read style. In many cases, the concerns of technical divers reflect those of scuba divers at every level. After all, as he says, technical diving is on the same spectrum as conventional sport diving: it is just a different frequency. Scuba Exceptional also deals in detail with the psychological approach to scuba diving, broaching topics from new angles and borrowing techniques and procedures from other fields of human activity. While most of Scuba Exceptional focuses on the diver, it also takes a look at the wider picture and highlights a

number of areas where scuba diving professionals and the “industry” as a whole are letting divers down. As always, Simon is realistic in his assessments. He may shine a little light on the dark side of the scuba diving world, but he does this in order to illuminate bad practice and encourage change, while offering solutions. He also provides insights on a wide range of topics. For instance, do you want to know... what makes someone a good diver? how to swim against a current without getting exhausted? how you can be out of air while you still have plenty to breathe? what the concept of failure points is? how to be a defensive diver? how preconditioning applies to scuba diving? how long you should really wait between diving and flying? when to call DAN (and when not to call)? how corals could possibly be animals when they look like rocks? how to avoid being left behind in the ocean? what’s happening in the world of rebreather diving? or what the perimeter of ignorance is? Scuba Exceptional has the answers to these questions and a lot more

how to be better prepared to lead during a major challenge or an immediate crisis. THE IMPORTANCE OF THIS BOOK: "All leaders at every level should take the time to reflect on their preparedness to lead others through a major challenge or immediate crisis. In the future... any of us could find ourselves in a 'leadership moment' where we will need to be at our best to make a difference for others!" - Frank Clay Inspired by the national crisis of the COVID 19 PANDEMIC, which clearly exposed the preparedness of our leaders in every capacity of leadership, this book was written to create more awareness about the various qualities of being a SUCCESSFUL LEADER. The content, quotes, and leadership tips are designed to help a leader make a self-examination of what it truly means for a leader to lead others through a major challenge or an immediate crisis. SUCCESSFUL LEADERS BIG BELIEVERS; How To Lead During Challenging Times is a reflective exercise for the reader to help build confidence and competence in their ability to lead others "RIGHT NOW." Frank Clay believes that to be a Successful Leader, you must be a Big Believer in the people you lead, the processes you lead with, your principles, your purpose, and the person you are as a leader. Mr. Clay shares the importance of establishing an impeccable work ethic in others and how a leader should go about achieving successful change in order to achieve exceptional results.

As newcomers flocked to Asheville over the last fifty years, they joined with locals to breathe new energy into the city. Sometimes called the Asheville One Thousand, these folks didn't necessarily intend to be entrepreneurs, community organizers and business leaders, but when they saw a challenge, they rose to it. Stone Soup became a gathering place and laid the foundation for Asheville's natural food culture. MANNA Food Bank emerged to help solve hunger. And the River Arts District turned into a vibrant cultural center for upcoming artists. Join author Marilyn Ball as she traces the bonds of community that gave rise to Asheville today.

Over the past decades, rapid developments in digital and sensing technologies, such as the Cloud, Web and Internet of Things, have dramatically changed the way we live and work. The digital transformation is revolutionizing our ability to monitor our planet and transforming the way we access, process and exploit Earth Observation data from satellites. This book reviews these megatrends and their implications for the Earth Observation community as well as the wider data economy. It provides insight into new paradigms of Open Science and Innovation applied to space data, which are characterized by openness, access to large volume of complex data, wide availability of new community tools, new techniques for big data analytics such as Artificial Intelligence, unprecedented level of computing power, and new types of collaboration among researchers, innovators, entrepreneurs and citizen scientists. In addition, this book aims to provide readers with some reflections on the future of Earth Observation, highlighting through a series of use cases not just the new opportunities created by the New Space revolution, but also the new challenges that must be addressed in order to make the most of the large volume of complex and diverse data delivered by the new generation of satellites.

Millions of American families have turned to The Book of Virtues and The Moral Compass by William J. Bennett for moral guidance in troubled times. Our Sacred Honor offers inspiration and instruction as well...this time of a particularly American sort. The lessons it contains are especially welcome. We live in a time when

the practice of representative government in the United States of America is under siege from both the left and the right. Scandals abound. We are first shocked, then wearied, to learn that our national leaders have feet of clay. We live in a time, in short, which demands that we return to our origins to discover the common principles that make us essentially American. Our Sacred Honor reveals those common principles. They are articulated by the flawed but deeply admirable men and women who first wrote what it is to be American. The pledge made by the Founders to one another that hot July day in 1776—the pledge of "our lives, our fortunes, and our sacred honor"—has been redeemed many times in the centuries since, but the nation they founded has never failed to profit from their example. It is time to profit from their advice. In Our Sacred Honor, William J. Bennett has collected the best that has been thought and said by and about the men and women who founded America. And what a group they are: George Washington, Thomas Jefferson, James Madison, Benjamin Franklin, Alexander Hamilton, John and Abigail Adams, and so many more that otherwise first-rate intellects such as John Dickinson, Benjamin Rush, and George Mason are relegated to the status of footnotes in the popular imagination. Not since Periclean Athens has such a small nation been led by so many larger-than-life figures. The only characteristic they shared more widely than revolutionary ardor was their talent (and inclination) for advice. Here is that advice on virtually every aspect of "the good"—good government, good relations between individuals and nations, and what it means to live a good life. Here are Thomas Jefferson on piety ("Adore God. Murmur not at the ways of Providence"); James Madison on justice ("It ever has been, and ever will be pursued, until it be obtained, or until liberty be lost in the pursuit"); and Patrick Henry on patriotism ("Is life so dear, or peace so sweet, as to be purchased at the price of chains and slavery?"). Here are Abigail Adams on love ("When he is wounded, I bleed..."); Benjamin Franklin on industry ("Have you somewhat to do tomorrow, do it today"); and George Washington on friendship

("Be courteous with all, but intimate with few"). Here are the lyrics to "Yankee Doodle," Longfellow's celebration of the midnight ride of Paul Revere, and the Declaration of Independence. Here are the stories of the Liberty Bell, Washington at Valley Forge, and Nathan Hale. Here are selections from The Federalist Papers, and Ralph Waldo Emerson's "Concord Hymn," with "the shot heard round the world." Here are Poor Richard's Almanack, the extraordinary correspondence between John and Abigail Adams, and George Washington's Farewell Address. The stories, songs, letters, and speeches collected in Our Sacred Honor are an inspiring celebration of American exceptionalism, produced by a collection of exceptional Americans. It is the best book of advice in more than two hundred years.
