An Easier and Better Way to Learn Anatomy. The human body is wondrously complex, with 700 muscles, 206 bones, and countless cells and tissues ... but studying and remembering all of them can be overwhelming! Instead of rote memorization, the Anatomy Coloring book helps you take an interactive approach to learning anatomy through coloring. Not only can this take less time than memorizing from textbooks and flashcards, but the process thoroughly fixes anatomical concepts in your mind for easier visual recall later.

A Flexibook for both the specialist and non-specialist, the new book offers accessible information on hematology in a succinct format. In addition to providing basic methodology, the book utilizes more than 260 color illustrations to detail the most up-to-date clinical procedures. Numerous tables and flow charts are included to assist in differential diagnosis, making this a valuable didactic reference for nurses, practicing physicians and residents preparing for board examinations.

Written by an expert dog whisperer and dog owner, the Kelpie Complete Owner's Manual has the answers you may need when researching this tireless herding breed. Learn about this highly energetic, very smart, purebred and find out whether or not this outstanding working dog will be the best choice for you and your family. Learn everything there is to know, including little known facts and secrets and how to care for every aspect of the Kelpie's life. This manual contains all the information you need, from birth to the Rainbow Bridge, including transitioning through house breaking, care, feeding, training and end of life, so that you can make a well-informed decision about whether or not this dog is the breed for you. If you already have a Kelpie, this book will teach you everything you need to know to make your dog a happy dog and to make you a happy dog owner. The author George Hoppendale is an experienced writer and a true animal lover. He enjoys writing animal books and advising others how to take care of their animals to give them a happy home. Co-Author Asia Moore is a professional Dog Whisperer, Cynologist and Author, living on Vancouver Island, off the west coast of British Columbia, in Canada, who believes that all humans and dogs can live together in harmony. She and her dog whispering team, which includes an 8-year-old Shih Tzu named Boris, teach dog psychology to humans, to help alleviate problem behaviors that arise between humans and their canine counterparts so that everyone can live a happy and stress-free life together. Covered in this book: - Temperament - Pros and Cons - Vital statistics - Before you buy - Choosing the right dog - Finding a breeder - Puppy proofing your home - The first weeks - Health and common health problems - Medical care & safety - Daily care - Feeding - Bad treats and snacks - Good treats and snacks - House training - Grooming - Training - Poisonous Foods & Plants - Caring for your aging dog and much more.

Successful gonioscopy is critical in the diagnosis of glaucoma and is an essential element of any thorough eye examination. It is also one of the most difficult ophthalmological techniques to learn and perform. The second edition is a comprehensive introduction to gonioscopic techniques and a vital manual for clinicians wishing to be proficient in examining the anterior segment of the eye. Highlights include new sections on selective laser trabeculoplasty, ultrasound biomicroscopy, and anterior segment ocular coherence tomography; updated text and references; and nearly 400 drawings and photographs. To vividly illustrate key examination techniques, a supplemental DVD features video clips of 12 basic and advanced gonioscopic techniques.

How many dinosaurs can your child name? Not that it's going to be graded or anything but such knowledge can contribute to your child's self-confidence. In the same way, this coloring book can improve self-esteem because it provides immediate satisfaction. There are other benefits to coloring. Discover all of them by making coloring a habit!

This book covers most skeletal landmarks that are palpable through manual palpation and virtual palpation (i.e., using 3D models generated from medical imaging). Each chapter focuses on a particular bone or segment and includes: a general anatomical presentation of the bone SL (using images showing real specimens and 3D bone models); very detailed descriptions of skeletal landmarks using manual palpation and virtual palpation. These definitions have been written in order to be reproducible. Each section includes detailed descriptions of all palpable skeletal landmarks for the current bone. Each landmark is described on one page. Also each landmark page is labelled by a unique acronym. The latter should be used for further data exchange and programming in order to guarantee that no redundant label exists. Full colour, over 500 full colour images Each bone is described in a separate section, making referencing easy Multidisciplinary approach
