Communication and Interpersonal Skills in Social Work are at the heart of effective social work practice. This book offers students a solid grounding in the core knowledge and skills of communication needed for effective practice. The book takes the key theories in communication and explains them in a systematic and practice-related way, essential for both undergraduate and postgraduate students to develop a critical understanding of the subject. This crucial fifth edition supports students with core communication skills by providing in-depth coverage closely interwoven with learning features that engage, stimulate and challenge. Working with children, adults and those with learning difficulties are all fundamental aspects of the book making it useful to students of all disciplines.

The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science

education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

Every successful organization needs high-performance teams to compete and succeed. Yet, technical people are often resistant to traditional "touchy-feely" teambuilding. To improve communication, performance, and morale among NASA ' s technical teams, former NASA Astrophysicist Dr. Charlie Pellerin developed the teambuilding process described in "How NASA Builds Teams"—an approach that is proven, quantitative, and requires only a fraction of the time and resources of traditional training methods. This "4-D" process has boosted team performance in hundreds of NASA project teams, engineering teams, and management teams, including the people responsible for NASA ' s most complex systems — the Space Shuttle, space

telescopes, robots on Mars, and the mission back to the moon. How NASA Builds Teams explains how the 4-D teambuilding process can be applied in any organization, and includes a fast, free on-line behavioral assessment to help your team and the individual members understand each other and measure the key driver of team performance, the social context. Moreover, these simple, logical processes appeal strongly to technical teams who eschew "touchy-feely" training. Pellerin applies simple, elegant principles from his physics background to the art teambuilding, such as the use of a coordinate system to analyze the characteristics of team performance into actionable elements. The author illustrates the teambuilding process with entertaining stories from his decade as NASA 's Director for Astrophysics and subsequent 15 years of working closely with NASA and outside business teams. For example, he tells how the processes in the book enabled him to initiate the space mission to fix the Hubble Space Telescope 's flawed mirror. Free downloadable resources will help you: Identify your teammates ' innate personalities Diagram your culture (And compare it to your customer 's) Measure the coherency of your project 's paradigm (Get this wrong and you will be fired!) and Learn to meet people 's need to feel valued by you. Further, you can download and use Pellerin 's most powerful tool for influencing the outcome of any difficult situation: the Context Shifting Worksheet.

Previous editions ('Social Skills in Interpersonal Communication') have established this work as the standard textbook on communication. Directly relevant to a multiplicity of research areas and professions, this thoroughly revised and updated edition has been expanded to include the latest research as well as a new chapter on negotiating. Key examples and summaries have been augmented to help contextualise the theory of skilled interpersonal communication in terms of its practical applications. Combining both clarity and a deep understanding of the subject matter, the

Authors have succeeded in creating a new edition which will be essential to anyone studying or working in the field of interpersonal communication.

This fully revised text demystifies interpersonal communication skills by bringing the latest research together with practical guidance that prepares students to discern key communication dynamics and communicate more effectively in all areas of their lives. The new edition draws on current theory and research to guide students through the foundations of the discipline, recent developments in scientific research, and tips for improving their own interpersonal communication skills. In addition, readers will find: Expanded coverage of technology and computer-mediated communication, including explicit examples of what interpersonal communication looks like online. Invitations to engage with elaborated descriptions of theories and related resources on the companion website whenever prominent theories of interpersonal communication are mentioned in the text. A commitment to gender inclusive language and topics, as well as a new feature, "IDEA: Inclusion, Diversity, Equity, and Access," that invites students to consider ways to address exclusion and inequity in interpersonal communication. The fully revamped companion website includes updates across all resources, additional videos, self-quizzes for students, and all-new instructor resources, which can be accessed at www.routledge.com/cw/solomon. Also new to the companion website for this edition are links to essays and videos featuring the work that students in the Communication Studies program at the California State Prison, Los Angeles County, produced in response to self-reflection prompts in the first edition. These materials provide insight into facets of interpersonal communication in these students' lives, and they offer a broad range of rich life experiences. Interpersonal Communication: Putting Theory Into Practice, Second Edition is ideal for undergraduate students in courses on interpersonal communication and communication skills.
