Each section of the net represents a different face on the 3D shape. Spheres don't have nets because it only has one curved face - it would be very difficult to create a net from that!

Nets of 3D shapes

A net can be folded up to make a 3D shape. There may be several possible nets for one 3D shape. You can draw a net on paper, then fold it into the shape. The net of a cube and a square based pyramid.

What are nets?

Teaching outside the classroom improves pupils' engagement with learning as well as their health and wellbeing, but how can teachers link curriculum objectives effectively with enjoyable and motivating outdoor learning in Year 6? The National Curriculum Outdoors: Year 6 presents a series of photocopiable lesson plans that address each primary curriculum subject, whilst enriching pupils with the benefits of learning in the natural environment. Outdoor learning experts Sue Waite, Michelle Roberts and Deborah Lambert provide inspiration for primary teachers to use outdoor contexts as part of their everyday teaching and showcase how headteachers can embed curriculum teaching outside throughout the school, whilst protecting teaching time and maintaining high-quality teaching and performance standards. All of the Year 6 curriculum lessons have been tried and tested successfully in schools and can be adapted and developed for school grounds and local natural environments. What's more, each scheme of work in this all-encompassing handbook includes primary curriculum objectives; intended learning outcomes; warm-up and main activities; plenary guidance; natural connections; ICT and PSHE links; and word banks.

"New Heinemann Maths" offers interactive, whole-class teaching, with structured development of mental calculation within the Framework. It covers planning and teaching; pupil material; structure and progression; support for more able children; and easy-to-manage assessment.

The Teaching File: Provides true variety and interactivity for your oral and mental starters. Suggests a wide choice of practical and oral teaching activities and suggestions for clearly focused review sessions. Activities enable you to adjust the pace of teaching to suit your class and offer options for consolidation, reinforcement, extension and differentiation

Jumpstart! Talk for Learning presents a collection of multi-sensory games and activities that will jumpstart children's use of effective talk in the classroom. This book offers practical and engaging ideas ranging from brief games to extended lesson suggestions. It offers a basis for creating your own spoken language activities to match topics you are teaching and individual needs of your class. Specifically written to help teachers with the direct teaching of talk skills required by the National Curriculum, activities in the book encourage children to: • participate in group and class discussions • use exploratory talk and share a range of points of view • use talk imaginatively to develop understanding • develop individual presentational talk • take part in active drama sessions Jumpstart! Talk for Learning includes a range of classroom activities that can be used in literacy lessons and integrated across the curriculum. This essential resource will help teachers develop children's use of talk to understand one another and get things done together.

Focusing on good progression from Reception to Year 6, Maths 5-11 provides a clear and concise presentation of the fundamental knowledge that all primary mathematics teachers need. It provides readers with practical knowledge for the planning and assessment necessary to employ the theories expressed in the book. Ranging from number sense and place value to looking in depth at the various aspects of fractions and mathematical reasoning, this book explores: mathematical connections inside and outside of the curriculum; the relation of mathematics to other primary subjects such as science, geography, and art; mathematics teaching practices from high-performing jurisdictions across the world; the progression of learning from primary school to secondary school; the 'big ideas' in mathematics; and

activities that provide strategies for children to use responsively and creatively. Helping primary teachers and mathematics coordinators improve and enhance their mathematical subject knowledge and pedagogy, Maths 5-11 will re-instil an excitement about teaching mathematics among its readers.

TestSoup's Parent Guide is specifically designed for parents who are looking to push their students to the next level with challenging math problems and concepts. We have compiled a collection of materials that have been designed to build upon the understandings and skills taught in the 5th grade Common Core math to push their thinking to the next level. You can use this eBook to learn about the skills they can work on to challenge themselves as well as do practice problems together. Premium Content Aligned to the Common Core Our eBook Study Guide helps students master Common Core Standards and push themselves with more challenging problems. Mini-lessons on every Common Core strand. Practice questions and answers aligned with new Common Core standards. Overviews of each strand within the Common Core that will tell you what you need to know, what you will be learning, and what you should expect to see in the Common Core. Great for teachers, parents, and students who are new to the Common Core! Superior User Interface Bookmark pages you want to revisit Make notes with our easy-to-use annotations tool Highlight important passages or questions with our highlight tool Adjust font size Skip to the last page read, or navigate using our table of contents Intuitive hyperlinks allow for intuitive and efficient navigation Content Outline Lessons, vocabulary, practice problems & explanations, as well as a description of what you and your student should expect from the new common core standards, for each of the following: Expressions & Equations Creating & solving expressions with whole number exponents Creating & solving expressions based on written descriptions Creating equivalent expressions Identifying equivalent expressions Creating expressions using variables to represent unknown numbers in word problems Solving equations & inequalities Using variables to write & solve equations for real world situations Writing inequalities to represent real life situations Determining relationships between variables in order to solve word problems Geometry Finding the area of polygons Finding the area of right rectangular prisms Drawing polygons in a coordinate plane Using 2d nets to represent 3d shapes & find surface area The Number System Dividing fractions Multiplying multi-digit numbers Adding, subtracting, multiplying & dividing decimals Finding greatest common factors and least common multiples Using positive & negative numbers to represent opposite values or directions Rational numbers as part of the number line Ordering & absolute value of positive & negative numbers Finding the distance between 2 points on a coordinate plane Ratios & Proportions Understanding ratios & using them to describe relationships Using unit rates to describe relationships between 2 quantities Using ratios to solve real world problems Statistics & Probability Identifying & creating statistical questions Describing the distribution of data with center, spread, or overall shape Describing the distribution of data with measures of center and measures of variability Recognizing & generating graphs to represent statistical data Summarizing data sets in relation to the question asked
