Written by a former federal prosecutor and public defender, Criminal Law and Procedure: A Courtroom Approach introduces students to the essentials of criminal law and procedure by illuminating the legal issues justice professionals face before, during, and after a criminal trial. Through the examination of statutes, edited case excerpts, and recent constitutional interpretation of black letter law, the text bridges the gap between learning criminal procedure and applying criminal law. Drawing from author Stephanie A. Jirard's vast experience in both the courtroom and the classroom, Criminal Law and Procedure gets students to think critically about real-world issues and practice applying the law in a just and meaningful way. Accessible and engaging, this text presents criminal law and procedure as an exciting opportunity to have a direct, positive impact on our communities and the criminal justice system. Key Features: "Making the Courtroom Connection" boxes help students apply the legal concepts they learn to real-life issues facing law enforcement, the court system, and correctional institutions today. Edited case excerpts connect criminal law and procedure with current case material on relevant topics so students can see the impact of judicial decision making. "Applying the Law to the Facts" boxes engage students' critical thinking skills and enhance their logical problem-solving abilities by providing opportunities to apply the rule of law to different scenarios. "Springboard for Discussion" prompts spark conversations and invite students to contrast the moral, ethical, and legal implications of criminal law and procedure in a larger context. Problem-solving exercises at the end of each chapter provide students with opportunities to test themselves on the material before a formal assessment. Active Learning Exercises in the Instructor's Manual enable professors to offer additional opportunities for experiential learning. Give your students the SAGE edge! A leading work in the field of international criminal law, which is accessible, comprehensive and up to date.

This casebook provides the most comprehensive treatment available, including the theoretical foundations, the common-law origins, the statutory structure, and the procedural context of modern criminal law. The book concentrates on doctrinal materials that can support both rigorous technical, and sophisticated theoretical, discussions. The purposes and limits of punishment are addressed through Supreme Court decisions, a focus on statutes throughout the substantive law sections enables training students in the legal art of statutory interpretation as well as exposing them to the hard moral and political problems of legislative choice, and the sentencing materials reprise the theory of punishment in the context of the practically most important stage of the modern process. The 12th edition carries forward the comprehensive approach of prior editions, empowering the teacher to design a course suited to the needs of the teacher's students and institution. New Supreme Court's decisions, changing the landscape of both substance and procedure, include Skilling v. United States, McDonald v. City of Chicago, Graham v. Florida, United States v. Jones, and Michigan v. Bryant. The material on self-defense has been comprehensively revised, both for the sake of clarity and to include discussion of so-called "stand your ground laws." Statutes (e.g., the New York and California homicide statutes) and the caselaw (e.g., up-to-the-minute material on "willful blindness") have been updated. We also now include a case about the admissibility of neuro-imaging evidence to support a diminished-capacity defense, thus acknowledging how modern brain science has begun to raise both practical evidentiary issues and a substantial challenge to important theoretical p
