Effective perfusion requires an optimal interplay between vascular volume and vasomotor tone. In the critical care setting, the blood volume and/or the vasomotor tone may be subject to rapid changes, and a patient may enter the critical care unit with preexisting disturbances resulting from trauma, disease, or pharmacologic treatment.

Current Issue : Current Opinion in Critical Care

Use of inotropes in critical care $CO = HR \times SV$ The SV depends on the SVR (afterload) and the "preload". Preload (the degree to which ventricles are stretched before contracting) correlates with the end diastolic volume (the volume of blood in a ventricle at the end of filling). It is important to optimise preload by

Use of inotropes in critical care

members of the UKCPA Critical Care Group. Since then it has become a widely used information source in UK hospital pharmacies. It is, as far as I am aware, the only document of its type in existence. The majority of the information on minimum volumes cannot be supported except by the anecdotal experiences of the contributing pharmacists.

Critical Care Clinics updates you on the latest trends in patient management, keeps you up to date on the newest advances, and provides a sound basis for choosing treatment options. Published four times a year—in January, April, July, and October—each issue focuses on a single topic in critical care, including cardiac emergencies, sepsis, infectious diseases, shock and trauma, neurologic problems, toxicology, pulmonary disorders, intensive care procedures, and patient observation.

Critical Care Clinics - Journal - Elsevier

Critical Care is a high-quality, peer-reviewed, international clinical medical journal. Critical Care aims to improve the care of critically ill patients by acquiring, discussing, distributing, and promoting evidence-based information relevant to intensivists. Critical Care aims to provide a comprehensive overview of the intensive care field.

Critical care preparation and management in the COVID-19 pandemic. 17 March 2020. As the UK enters the 'Delay' phase, hospitals can take action to prepare for super-surge capacity and the peak in demand for invasive mechanical ventilation. Outlined below are both operational and clinical guidance.

Critical care – ICM Anaesthesia COVID-19

Gastric residual volume (GRV) is considered a surrogate parameter of GI dysfunction during the progression of enteral feeding in the early phase of critical illness and beyond. By monitoring GRV, clinicians may detect patients with delayed gastric emptying earlier and intervene with strategies that minimize or prevent VAP as one of the major risks of EN.

This title in the Essentials of Anesthesia and Critical Care series presents core clinical neuroanesthesia and neurointensive care knowledge in a practical, user-friendly format. Provides the key neuroanesthesia and neurointensive care information you need from authorities you trust. Uses a concise, user-friendly format to help you locate answers quickly. Features key points boxes in each chapter to help you quickly access the most crucial information. Includes annotated references that guide you to the most relevant additional resources. Features a compact size and clinical emphasis that facilitates and enhances bedside patient care.

Interpreting the Volume-Outcome Relationship in the Context of Cancer Care is a summary of a workshop held on May 11, 2000, which brought together experts to review evidence of the relationship between volume of services and health-related outcomes for cancer and other conditions, discuss methodological issues related to the interpretation of the association between volume and outcome, assess the applicability of volume as an indicator of quality of care; and identify research needed to better understand the volume--outcome relationship and its application to quality improvement.

The aim of this comprehensive encyclopedia is to provide detailed information on intensive care medicine contributing to the broad field of emergency medicine. The wide range of entries in the Encyclopedia of Intensive Care Medicine are written by leading experts in the field. They will provide basic and clinical scientists in academia, practice, as well as industry with valuable information about the field of intensive care medicine, but also people in related fields, students and teachers will benefit from the important and relevant information on the most recent developments in emergency medicine. The Encyclopedia will contain 4 volumes, and published simultaneously online. The entire field has been divided into 14 sections. All entries will be arranged in alphabetical order with extensive cross-referencing between them.

The second edition of Pediatric Critical Care Medicine spans three volumes, with major sections dedicated to specific organ systems. Each major section consists of separate chapters dedicated to reviewing the specific disease processes affecting each organ system. Each chapter concludes with a comprehensive list of references, with brief, concise remarks denoting references of 'special interest' and 'of interest'. Consequently, the books are unique in their comprehensive coverage of pediatric critical care and their ease of use and will be of value to those studying towards pediatric critical care examinations and those who are already qualified.

This volume is published under the auspices of the World Federation of Societies of Intensive Care Medicine, which consists of 48 members societies (both medical and nursing) - a truly world wide organisation - and whose aim is to promote excellence in the care of critically ill patients. The volume will be distributed to delegates on occasion of the 9th International Congress of the World Federation of Societies of Intensive and Critical Care Medicine, to be held in Buenos Aires at the end of August 2005.

A practical manual for clinicians in the care of critically ill patients. This volume covers nephrology, neurology, obstetrics care, pain, agitation, and delirium, perioperative assessment, procedures, pulmonology, radiology, and toxicology.
