Crossroads of Decision: The State Department and Foreign ...

In this provocative interpretation of New Deal diplomacy, Howard Jablon challenges the view that the State Department was wiser and more expert at international maneuver than was President Franklin D. Roosevelt in the early years of his presidency. These were years of growing world tension, with the preliminary shots of World War II being fired as Japan took over Manchuria, Italy made Ethiopia an extension of its new Roman Empire, and all the European great powers tried out their new weaponry in Spain. The author argues that the department's advice in this period actually led to unfortunate decisions which later had a considerable impact on events leading to World War II. Former Secretary of State Cordell Hull wrote in his memoirs that the United States was at the "oriental crossroads of decision" in 1934. Hull and his colleagues in the State Department did not suggest blocking the Japanese. Instead, they recommended continuing the ineffective nonrecognition policy. Consequently, the roads taken by American diplomacy at this and other junctures were equally unfortunate. To date no one has criticized the influence of the State Department on New Deal diplomacy. Crossroads of Decision represents a timely and important contribution to our understanding of both the State Department and foreign policy in this interwar period of rapid change, when diplomatic courses were set that allowed for no turning back.

Against the backdrop of China's mounting influence and North Korea's growing nuclear capability and expanding missile arsenal, South Korea faces a set of strategic choices that will shape its economic prospects and national security. In South Korea at the Crossroads, Scott A. Snyder examines the trajectory of fifty years of South Korean foreign policy and offers predictions—and a prescription—for the future. Pairing a historical perspective with a shrewd understanding of today's political landscape, Snyder contends that South Korea's best strategy remains investing in a robust alliance with the United States. Snyder begins with South Korea's effort in the 1960s to offset the risk of abandonment by the United States during the Vietnam War and the subsequent crisis in the alliance during the 1970s. A series of shifts in South Korean foreign relations followed: the "Nordpolitik" engagement with the Soviet Union and China at the end of the Cold War; Kim Dae Jung's "Sunshine Policy," designed to bring North Korea into the international community; "trustpolitik," which sought to foster diplomacy with North Korea and Japan; and changes in South Korea's relationship with the United States. Despite its rise as a leader in international financial, development, and climate-change forums, South Korea will likely still require the commitment of the United States to guarantee its security. Although China is a tempting option, Snyder argues that only the United States is both credible and capable in this role. South Korea remains vulnerable relative to other regional powers in northeast Asia despite its rising profile as a middle power, and it must balance the contradiction of desirable autonomy and necessary alliance.

Some seventy-five years after the boundaries of the British Mandate for Palestine were set, the State of Israel still lacks a defined territory and agreed-upon boundaries, except for its boundary with Egypt. This book examines this unusual situation, concentrating especially on the perceptions of territory and boundaries within the Zionist movement. Galnoor discusses the period from the first territorial decision in 1919 up to the establishment of the State of Israel in 1948, placing special emphasis on the relatively unknown Zionist, Palestinian, and Arab positions regarding territorial partition in 1937. And he argues that although dramatic changes have occurred in the international and regional arena, the partners to the conflict, the security considerations, and the international dilemmas, the 1937 decision contained the parameters of the choices that have confronted Arab and Israeli leaders ever since. His findings are of direct relevance to the ongoing Arab-Israeli peace negotiations, which once again revolve around the trade-off between national goals and territorial aspirations.

Weaving national narratives from stories of the daily lives and familiar places of local residents, Francoise Hamlin chronicles the slow struggle for black freedom through the history of Clarksdale, Mississippi. Hamlin paints a full picture of the town ov

Have you ever wondered how egalitarian and complementarian marriages play out differently on a day-to-day level? In this unique book Aida and William Spencer and Steve and Celestia Tracy, two couples from the differing perspectives of egalitarianism and soft complementarianism, share a constructive dialogue about marriage in practice. They cover a variety of topics like marriage discipleship, headship and submission, roles and decision-making, and intimacy in marriage. Also included are responses from three additional cultural frameworks: North American Hispanic, Korean American and African American. Whether you're still working out your views on marriage or have found an approach you're comfortable with, this book will help you better understand the two perspectives on the ground level. While the theological starting points are different, you may be surprised to see the degree of convergence on practical issues as the dialogue unfolds.

Modern social sciences have, over the past forty years, been committed to the improvement of public policy. More recently, however, doubts have arisen about the possibility and desirability of a policy-oriented social science. In this book, leading specialists in the field analyze both the development and failings of policy-oriented social science. In contrast to other writings on the subject, this volume presents a distinctively historical and comparative approach. By looking at earlier periods, the contributors demonstrate how policy orientation has been central to the emergence and evolution of the social sciences as a form of professional activity. Case studies of rarely examined societies such as Poland, Brazil and Japan further demonstrate the various ways in which intellectual developments have been shaped by the societal contexts in which they have emerged and how they have taken part in the shaping of these societies.

The authors give the most comprehensive, authoritative and compelling account yet of the troubled state of business education today and go well beyond this to provide a blueprint for the future.

Indiana is at an economic crossroads. Its history and culture do not embrace change, yet its economy is heavily tied to manufacturing and exports—both of which are highly sensitive to the ever-changing global economy. The Hoosier state is aging and experiencing a brain drain from its universities. Its infrastructure needs repair and updating. And its public schools are average at a time when excellence is demanded. Indiana is at a point in its history when it must make decisions about the directions it will take in the future. Author Mark Aker examines the culture of Hoosiers and what makes them happy, the global economic forces that the state is facing, and describes those actions that state and local governments must implement to compete for economic growth—world-class infrastructure, the best education system anywhere, highly attractive cities and towns, meaningful incentives, and a stable, predictable, and helpful government. But even if these basic needs are addressed, can Indiana eventually prosper and develop a broad-based, innovative economy? Indiana (In)Decision describes Indiana's dilemma of indecisiveness at a time requiring rapid decision-making about its economic future. The book is meant for everyone, not just economists or academics.

The devil is the most charismatic and important figure in the blues tradition. He's not just the music's namesake ("the devil's music"), but a shadowy presence who haunts an imagined Mississippi crossroads where, it is claimed, Delta bluesman Robert Johnson traded away his soul in exchange for extraordinary prowess on the guitar. Yet, as scholar and musician Adam Gussow argues, there is much more to the story of the devil and the blues than these clichéd understandings. In this groundbreaking study, Gussow takes the full measure of the devil's presence. Working from original transcriptions of more than 125 recordings released during the past ninety years, Gussow explores the varied uses to which black southern blues people have put this trouble-sowing, love-wrecking, but also empowering figure. The book culminates with a bold reinterpretation of Johnson's music and a provocative investigation of the way in which the citizens of Clarksdale, Mississippi, managed to rebrand a commercial hub as "the crossroads" in 1999, claiming Johnson and the devil as their own.

Excerpt from The Record of the Hampden-Sydney Alumni Association. Vol. 35: July, 1961 The United States is at the crossroads. Decisions are being made which may determine its future for generations or centuries. The same is true of hampden-sydney, in its own smaller but important sphere. The decision as to the kind of college it is to be is now in the balance. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
