This project started as a language learning experiment. Matthew Helmke was sitting in a cafe with a Moroccan having a discussion in Moroccan Arabic. The friend told a joke and it was quickly discovered that vocabulary alone would not insure an understanding of humor. This prompted a question, "What did I miss?" In this book, Matthew Helmke explores

the hidden aspects of Moroccan culture. These are the things that Moroccans know inherently, without being taught. The result is an intriguing look through the eyes of an American trying to make sense of Moroccan culture.

In this book, I attempt to show how colonial and postcolonial political forces have endeavoured to reconstruct the national identity of Morocco, on the basis of cultural representations and ideological constructions closely related to nationalist and ethnolinguistic trends. I discuss how the

issue of language is at the centre of the current cultural and political debates in Morocco. The present book is an investigation of the ramifications of multilingualism for language choice patterns and attitudes among Moroccans. More importantly, the book assesses the roles played by linguistic and cultural factors in the development and evolution of Moroccan society. It also focuses on the impact of multilingualism on cultural authenticity and national identity. Having been involved in research on language and culture for many years, I am particularly interested in linguistic and cultural

assimilation or alienation, and under what conditions it takes place, especially today that more and more Moroccans speak French and are influenced by Western social behaviour more than ever before. In the process, I provide the reader with an updated description of the different facets of language use, language maintenance and shift, and language attitudes, focusing on the linguistic situation whose analysis is often blurred by emotional reactions, ideological discourses, political biases, simplistic assessments, and ethnolinguistic identities.

Culture and politics in Morocco are an interactive blend of conflict and congruence. John P. Entelis argues that no single form defines Morocco's national identity and

identifies four cultural patterns--monarchical, modernist, militarist, and messianic--that compete with each other yet share strong ties to an overriding cultural core of 'Muslim consensus'. This consensus explains much of the country's success in reconciling cultural differences in a relatively nonviolent manner and in creating a pluralistic, open and populist society. Entelis argues that Morocco, at a critical juncture in its postindependence history, may be able to overcome challenges from international pressures and socioeconomic problems because of its

"This book offers a richly documented survey of modern Moroccan history. Concise and readable, it will enthrall all those searching for the background to present-day events in the region"--
