Deception is omnipresent throughout the evolution of life, inseparable from the development of various modes of communication. By effectively manipulating the behavior of others, apparently by taking advantage of recipients' own rules, communicators are able to gain an advantage while negotiating meaning in a cross-cultural environment. Even though much research related to deceptive behavior and its detection has been conducted in recent years, little of it has concentrated on deception outside of a North American context. This monograph addresses that lacuna. Consistently, most research on deception has examined face-to-face verbal communication and ignored computer-mediated communication. In response, this book also provides detailed insights into how computer-mediated communication and adopted cultural values affect deceptive communication and deception detection across cultures, namely in Poland and the USA. It focuses on discussing theories about why cues to deception exist, theories specific to verbal cues to deception, and theories about computer mediation in communication. The book also proposes a research model postulating relationships between computer-mediated communication media, cue detection, media familiarity, national culture, espoused cultural values, veracity judgment success, and deceptive communicative behavior.

Human beings have an intrinsic need to be with people who are similar to themselves. This is because they share the same ways of doing things, the same values, and function according similar rules. When one is with people who tend to be similar, human behavior is normalized, and one's actions appear to be in accordance with those exhibited by others in one's social circle. However, sometimes it becomes apparent that the situation is somewhat more complex. When this happens, one realizes that the issues that have been taken for granted about human interaction are not necessarily the same for everyone. This book elucidates what happens in the processes of communication when people from different cultural backgrounds experience other cultures. Emphasis is also given to the issue of interaction between people from various cultures. The book highlights the aspects that are recognized to posit difficulties in conveying messages from one culture to another. The notions of schemata, frames, scenarios and cultural scripts are outlined. The third part of the book examines some principles of critical discourse analysis, including, for instance, socio-political attitude, as well as concentrating on the notion of power relations of groups, legitimated by text as well as speech. This part also describes the concept of persuasion, as well as persuasive communication. The fourth part of the book is analytic. Attention is given to various discourses one encounters in everyday life and to the examination of various kinds of discourse, including for instance, complimenting, as well as political, discourse. As such, this book provides a new point of view for linguists as well as those interested in communication practice. The empirical part of the book will help shed some light on dilemmas people may be obliged to face in their career, and should be especially useful to students of intercultural communication.

Why Noncompliance traces the history of noncompliance within the European Union (EU), focusing on which states continuously do or do not follow EU Law, why, and how that affects the governance in the EU and beyond. In exploring the EU's long and varied history of noncompliance, Tanja A. Břetzel takes a close look at the diverse groups of noncompliant states throughout the EU's existence. Why do states that are vocally critical of the EU have a better record of compliance than those that support the EU? Why has noncompliance been declining since the 1990s, even though the EU was adding member-states and numerous laws? Břetzel debunks conventional wisdoms in EU compliance research, showing that noncompliance in the EU is not caused by the new Central and Eastern European member states, nor by the Eurosceptic member states. So why do these states take the brunt of Europe's misplaced ire? Why Noncompliance introduces politicization as an explanatory factor that has been long overlooked in the literature and scholarship surrounding the European Union. Břetzel argues that political controversy combined with voting power and administrative capacity, explains why noncompliance with EU law has been declining since the completion of the Single Market, cannot be blamed on the EU's Central and Easter European member states, and is concentrated in areas where EU seeks to protect citizen rights. Thanks to generous funding from Freie Universitat Berlin, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellopen.org) and other repositories.

A broad examination of the rise of nationalism, populism, xenophobia, and racism throughout the world The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism provides expert insight into the complex, interconnected factors that are influencing patterns of human relations worldwide in a time of rising populist nationalism, intensified racial and religious tensions, and mounting hostilities towards immigrants and minorities. Analyzing the underlying forces which continue to drive global trends, this volume examines contemporary patterns based on the most recent evidence spanning five continents/offering a diversity of interpretations, models and perspectives that address the challenges facing the study of race, ethnicity, and nationalism. The Companion features original contributions by both established experts and emerging scholars that explore an expansive range of theoretical, historical, and empirical case studies. Organized into five sections, the text first discusses growing trends in the United States, the significance of populism in major societies around the globe, and how global changes are influencing regional variations in race, ethnicity, and nationalism. An investigation of global migration patterns is followed by examination of conflict and violence, from urban riots and boundary disputes to warfare and genocide. The final section focuses on the policy debates resulting from changing patterns and their impact on politics, the economy, and society. Timely and highly relevant, this book: Discusses contemporary issues such as the failure of school systems to provide equal opportunities to minorities, the evolution of the School-to-Prison pipeline, and the Black Lives Matter movement Explores shifts in American race relations, the influence of social media and the internet, and the links between increased globalization and contemporary forms of nationalism, racism, and populism Features essays on national and ethnic identity in China, Japan, and South Korea, India, Central Asia, Africa, Latin America, and Europe Analyzes policies regarding borders, immigration, refugees, and human rights in different countries and regions Offers perspectives on the radicalization of social movements, the creation of ethnic, linguistic and other boundaries between groups, and the models used to understand intractable conflicts in many global settings The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism is an indispensable resource for scholars, researchers, instructors, and students across the social sciences, including sociology, political science, global affairs, economics, comparative race and ethnic relations, international migration, social change, and sociological theory.

Ukraine: State and Nation Building explores the transformation of Soviet Ukraine into an independent state and examines the new elites and their role in the state building process, as well as other attributes of the modern nation-state such as borders, symbols, myths and national histories. Extensive primary sources and interviews with leading members of Ukrainian elites, show that state building is an integral part of the transition process and cannot be divorced from democratization and the establishment of a market economy.

The growing amount of false and misleading information on the internet has generated new concerns and quests for research regarding the study of deception and deception detection. Innovative methods that involve catching these fraudulent scams are constantly being perfected, but more material addressing these concerns is needed. The Handbook of Research on Deception, Fake News, and Misinformation Online provides broad perspectives, practices, and case studies on online deception. It also offers deception-detection methods on how to address the challenges of the various aspects of deceptive online communication and cyber fraud. While highlighting topics such as behavior analysis, cyber terrorism, and network security, this publication explores various aspects of deceptive behavior and deceptive communication on social media, as well as new methods examining the concepts of fake news and misinformation, character assassination, and political deception. This book is ideally designed for academicians, students, researchers, media specialists, and professionals involved in media and communications, cyber security, psychology, forensic linguistics, and information technology.

This book explains the position of the rebels in Southeastern Ukraine. It follows the rebellion's fortunes after Moscow did not repeat the Crimea scenario in Donbas, analyzes the logic of armed struggle and the phenomenon of the Russian Spring, and introduces prospects for solutions.

This book documents developments in the countries of eastern Europe, including the rise of authoritarian tendencies in Russia and Belarus, as well as the victory of the democratic 'Orange Revolution' in Ukraine, and poses important questions about the origins of the East Slavic nations and the essential similarities or differences between their cultures. It traces the origins of the modern Russian, Ukrainian and Belarussian nations by focusing on pre-modern forms of group identity among the Eastern Slavs. It also challenges attempts to 'nationalize' the Rus' past on behalf of existing national projects, laying the groundwork for understanding of the pre-modern history of Russia, Ukraine and Belarus. The book covers the period from the Christianization of Kyivan Rus' in the tenth century to the reign of Peter I and his eighteenth-century successors, by which time the idea of nationalism had begun to influence the thinking of East Slavic elites.

International Security Studies (ISS) has changed and diversified in many ways since 1945. This book provides the first intellectual history of the development of the subject in that period. It explains how ISS evolved from an initial concern with the strategic consequences of superpower rivalry and nuclear weapons, to its current diversity in which environmental, economic, human and other securities sit alongside military security, and in which approaches ranging from traditional Realist analysis to Feminism and Post-colonialism are in play. It sets out the driving forces that shaped debates in ISS, shows what makes ISS a single conversation across its diversity, and gives an authoritative account of debates on all the main topics within ISS. This is an unparalleled survey of the literature and institutions of ISS that will be an invaluable guide for all students and scholars of ISS, whether traditionalist, 'new agenda' or critical.

Nation-building as a process is never complete and issues related to identity, nation, state and regime-building are recurrent in the post-Soviet region. This comparative, inter-disciplinary volume explores how nation-building tools emerged and evolved over the last twenty years. Featuring in-depth case studies from countries throughout the post-Soviet space it compares various aspects of nation-building and identity formation projects. Approaching the issue from a variety of disciplines, and geographical areas, contributors illustrate chapter by chapter how different state and non-state actors utilise traditional instruments of nation-construction in new ways while also developing non-traditional tools and strategies to provide a contemporary account of how nation-formation efforts evolve and diverge.
