The objective of
the NATO
Advanced
Research
Workshop
"Learning
electricity and
electronics with
advanced
educational

Get Free Electrotechnics

technology" was
to bring
together
researchers
coming from
different
domains.

Electricity
education is a
domain where a
lot of research
has already been
made. The first
meeting on

Get Free Electrotechnics

electricity
teaching was
organized in
1984 by R. Duit,
W. Jung and C.
von Rhoneck in
Ludwigsburg
(Germany). Since
then, research
has been going
on and we can
consider that
the workshop was
the successor of

Get Free Electrotechnics

this first
meeting. Our
goal was not to
organize a
workshop
grouping only
people producing
software in the
field of
electricity
education or
more generally
in the field of
physics

Get Free Electrotechnics

education, even
if this software
was based on
artificial
intelligence
techniques. On
the contrary, we
wanted this
workshop to
bring together
researchers
involved in the
connection
between

Get Free Electrotechnics

cognitive
science and the
learning of a
well defined
domain such as
electricity. So
during the
workshop, people
doing research
in physics
education,
cognitive
psychology, and
artificial

Get Free Electrotechnics

intelligence had the opportunity to discuss and exchange. These proceedings reflect the different points of view. The main idea is that designing a learning environment needs the confrontation of

Get Free Electrotechnics

different
approaches. The
proceedings are
organized in
five parts which
reflect these
different
aspects.

Get Free Electrotechnics
