Effective risk management at central banks is best enabled by a sound framework embedded throughout the organization that supports the design and execution of risk management activities. To evaluate the risk management practices at a central bank, the Safeguards Assessments Division of the IMF's Finance Department developed a tool that facilitates stocktaking of elements that are present and categorizes the function based on its maturity. Tailored recommendations are then provided to the central bank which provide a roadmap to advance the risk management function.

"It has often been said that 'to improve, one must be prepared to measure the improvement' and 'one must inspect what one expects.' The Kerzner Project Management Maturity Model has provided this tangible measure of maturity. The rest is up to a company to set the expectations and to inspect the results."--Bill Marshall, Nortel Global Project Process Standards (from the Foreword) Strategic planning for project management—a proven model for assessment and continuous improvement Harold Kerzner's landmark Project Management has long been the reference of choice for outstanding coverage of the basic principles and concepts of project management. this new book, Kerzner has developed a unique, industry-validated tool for helping companies assess their progress in integrating project management throughout their organization. Strategic Planning for Project Management Using a Project Management Maturity Model begins by examining the principles of strategic planning and how they relate to project management. The second part of the book introduces the PMMM, detailing the five different levels of development for achieving maturity, along with benchmarking instruments for measuring an organization's progress along the maturity curve. These assessment tools can easily be customized to suit individual companies—a particularly valuable feature of the model. Offering vital guidance for making project management a strategic tool for competitive advantage, this book helps managers, engineers, project team members, business consultants, and others build a powerful foundation for company improvement and excellence.

In your identity and access management maturity model, how do you know who has access to what? What is the level of your organization's data management maturity? How do you characterize the project management maturity of your organization? How do you know who has access to what? Does the third party have governance mechanisms for customer service scripts and call recordings? Defining, designing, creating, and implementing a process to solve a challenge or meet an objective is the most valuable role... In EVERY group, company, organization and department. Unless you are talking a one-time, single-use project, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)President, CxO etc... - they are the people who rule the future. They are the person who asks the right questions to make Management Maturity investments work better. This Management Maturity All-Inclusive Self-Assessment enables You to be that person. All the tools you need to an in-depth Management Maturity Self-Assessment. Featuring 995 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in which Management Maturity improvements can be made. In using the questions you will be better able to: - diagnose Management Maturity projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Management Maturity and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Management Maturity Scorecard, you will develop a clear picture of which Management Maturity areas need attention.
