The new edition of this influential textbook gathers leading lawyers and political scientists to provide an overview of the changing legal picture in Europe, including the reforms instigated by the Lisbon Treaty negotiations. Authors analyse the evolution of the law across time, giving readers a clearer understanding of how the EU is developing.

The most current, contextual and authoritative EU law text, including Brexit, the euro, and the migration crisis.

The third edition of *EU Customs Law* provides a fully updated treatment of legislation, new treaties and cases in the two courts of the EU especially but also in Member States. This volume also includes commentary on the Modernized Community Customs Code and Implementing Regulation and increased coverage of areas such as the wider role of customs authorities apart from the collection of customs duty, such as security of goods and post 9/11 developments generally, the history of customs unions and their implications for governments, non-EU customs unions to which EU law is relevant, and the inter-relation between customs duty and direct tax.

This book focuses on the substantive law of the EU with regard to the free movement of goods, persons, services, and capital. An introductory chapter outlines the background to EU law in this sphere; the role of free trade theory, the development of economic integration until the present day, and the fundamental principles underpinning this development. The following sections then provide a detailed examination of the major categories - goods, persons, services and capital - and a concluding section deals with the legal issues raised by the ongoing process of harmonisation within the single market. The author makes judicious use of case studies to illustrate and develop central issues, diagrams and flowcharts to clarify the more complex areas of this sphere of EU law. Now in its third edition, this invaluable handbook offers practical solutions to issues arising in relation to data protection law. It is fully updated and expanded to include coverage of all of the significant developments in the practice of data protection, and takes account of the wealth of guidance published by the Information Commissioner since the last edition. The third edition includes new material on the changes to the Commissioner's powers and new guidance from the Commissioner's office, coverage of new cases on peripheral aspects of data protection compliance and examples of enforcement, the new code on CCTV processing, the new employment code, clarification on the definition of "personal data", the binding corporate rules on the exemption to the export data ban and the new ICT set of model contractual provisions for data exports, and the proposed action by the EU against the UK for failing to implement the Data Protection Directive appropriately. There are new chapters on terminology and data security.

The third edition of *EU Administrative Law* provides comprehensive coverage of the administrative system in the EU and the principles of judicial review that apply in this area. This revised edition provides important updates on each area covered, including new case law; institutional developments; and EU legislation. These changes are located within the framework of broader developments in the EU. The chapters in the first half of the book deal with all the principal variants of the EU administrative

regime. Thus there are chapters dealing with the history and taxonomy of the EU administrative regime; direct administration; shared administration; comitology; agencies; social partners; and the open method of coordination. The coverage throughout focuses on the legal regime that governs the particular form of administration and broader issues of accountability, drawing on literature from political science as well as law. The focus in the second part of the book shifts to judicial review. There are detailed chapters covering all principles of judicial review and the discussion of the law throughout is analytical and contextual. It begins with the principles that have informed the development of EU judicial review. This is followed by a chapter dealing with the judicial system and the way in which reform could impact on the subject matter of the book. There are then chapters dealing with competence; access; transparency; process; law, fact and discretion; rights; equality; legitimate expectations; two chapters on proportionality; the precautionary principle; two chapters on remedies; and the Ombudsman.
