The developmental history of the tractors built by the dominant agricultural manufacturer of the early 20th Century, International Harvester, is dramatically told in The Farmall Dynasty. The book traces the evolution of the Farmall tractor from the early Titans and Moguls through to modern times. The book includes well-researched accounts of the development of the original Farmall, the Letter Series, 4100, Cub, and other legendary IHC tractors, with first-hand accounts from factory engineers describing the challenges they faced.

How to Restore Farmall Tractors, the only Farmall restoration guide, is back in print, packed with more than 300 photographs, proven tips and techniques, and money-saving advice from experts who know what works...and what doesn't.

In *Farmall 100 Years*, award-winning tractor author, photographer, and historian Randy Leffingwell offers a richly illustrated and detailed book that captures the full story of the iconic tractors. Farmall tractors are among the most influential and iconic farm machines in history. From the first model in 1923 to their final model year in 1973, International Harvester revolutionized the tractor world by conceiving the Farmall brand, revolutionary all-purpose tractors designed for small- to medium-sized farms. Beautiful, contemporary photos and rare historical images accompany in-depth analyses of milestone tractors. The engaging text examines engineering developments, their historical context, and key figures. Notably, the story is told through the lens of the three dozen most influential Farmalls across the brand's history. From the Farmalls to the legendary and best-selling Letter Series unveiled in the 1930s, the entry-market Cub launched in 1947, the Hundred Series introduced in 1954, and beyond, Leffingwell provides a unique, unprecedented perspective on a farming giant. By 1947, Farmall had built over 1 million tractors. Amazingly, many are still in use today as collector vehicles as well as working farm tractors. *Farmall 100 Years* brings the story to life in the ultimate tribute to these enduring machines.

The complete history of the tractor that changed farming forever. Award-winning author and photographer Randy Leffingwell and renowned tractor historian Robert N. Pripps tell the story of the Farmall tractor, one of the most significant and popular farm tractors ever made. International Harvester's Farmall ushered in innovations in engineering, manufacturing, and design that changed the world of tractors. Along the way, the Farmall became an icon in agriculture. In *Farmall: The Red Tractor That Revolutionized Farming*, the history of the Farmall is traced from the first Farmall, developed in the early 1920s, through its evolution to the new Farmall models. The book combines a broad cultural history of Farmall with photos of restored machines, as well as color and black and white archival photography. Trace all of the tractor models, variations, improvements, engine and hydraulic advances, and accompanying implements through every Farmall generation. This new, up-to-date history of Farmall includes the latest models and implements, bringing you all of the information you want about these unique tractors.
