The G-spot, Female Ejaculation, and Squirting. The G-spot plays a vital role in female ejaculation and squirting. Female ejaculation is when a girl or a woman ejaculate a thick, scanty, whitish, and milky fluid during sex or fingering. And Squirting is when the girl or woman gushes forth a clear fluid right before or

Okay everyone, it's time to talk about female ejaculation - because it's not as mysterious as many would like to believe. Scientists have found evidence that women who 'squirt' are expelling one of two different types of liquid - one pure urine, and the other a combination of urine and fluid from the female prostate gland.
