Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.'

Combining historical geography with historical demography, and conceived as a study in environmental history, this book examines the long-term relationship between population, economy and environment in the northern half of the Indonesian island of Sulawesi.

A number of UN conventions and declarations (on the Rights of Indigenous Peoples, the Protection and Promotion of the Diversity of Cultural Expressions and the World Heritage Conventions) can be understood as instruments of international governance to promote democracy and social justice worldwide. In Indonesia (as in many other countries), these international agreements have encouraged the self-assertion of communities that had been oppressed and deprived of their land, especially during the New Order regime (1966-1998). More than 2,000 communities in Indonesia who define themselves as masyarakat adat or "indigenous peoples" had already joined the Indigenous Peoples' Alliance of the Archipelago" (AMAN) by 2013. In their efforts to gain recognition and self-determination, these communities are supported by international donors and international as well as national NGOs by means of development programmes. In the definition of masyarakat adat, "culture" or adat plays an important role in the communities' self-definition. Based on particular characteristics of their adat, the asset of their culture, they try to distinguish themselves from others in order to substantiate their claims for the restitution of their traditional rights and property (namely land and other natural resources) from the state. The authors of this volume investigate how differently structured communities - socially, politically and religiously - and associations reposition themselves vis-à-vis others, especially the state, not only by drawing on adat for achieving particular goals, but also dignity and a better future.

A soup-to-nuts introduction to small, economical sailing craft Trailer sailers--the smallest, most economical sailboats with sleeping accommodations--are a popular platform for learning the basics of sailing and are often considered to be the entry level to cruising under sail. Author Brian Gilbert shows how trailer sailers can be the ideal craft for a lifetime of enjoyment, including serious, long-distance cruising. This book covers all the bases, including how to inspect, buy, and equip a boat; how to trailer, sail, navigate, and cruise in small boats; how to use communications and navigation equipment; and more.

The Book of Five Rings is a text on kenjutsu and the martial arts in general, written by the Japanese swordsman Miyamoto Musashi around 1643. Written over three centuries ago by a Samurai warrior, the book has been hailed as a limitless source of psychological insight for businessmen-or anyone who relies on strategy and tactics for outwitting the competition.
