This new edition features material from business, law and literary texts. This is Essential reading for advanced undergraduates and postgraduate students of French, the book will also appeal to language students and tutors.

English-French Translation: A Practical Manual allows advanced learners of French to develop their translation and writing skills. This book provides a deeper understanding of French grammatical structures, the nuances of different styles and registers and helps increase knowledge of vocabulary and idiomatic language. The manual provides a wealth of practical tasks based around carefully selected extracts from the diverse text types students are likely to encounter, from literary and expository, to persuasive and journalistic. A mix of shorter targeted activities and lengthier translation pieces guides learners through the complexities and challenges of translation from English into French. This comprehensive manual is ideal for advanced undergraduate and postgraduate students in French language and translation.

Excerpt from A Dictionary of English Idioms With Their French Translation As this volume has been prepared especially with the view of enabling the American to translate his own language into grammatical, idiomatic, written and colloquial French, and of rendering it equally useful for the library, the parlor, and the counting-house, as well as the school-room, such phrases have been selected in preference as relate to literature, the fine arts, and commerce, besides conversational expressions, and terms of etiquette in established use. These have been carefully classified and translated into French, according to the rules of Grammar and the usage of polite society; in such cases, when the sense is liable to be affected by the context or circumstances, the translation is made in as many forms or synonymous expressions as are necessary to illustrate the various shades of meaning in which the term may occur. This new edition has been fully revised and updated to offer up -to-date vocabulary and language support for student's learning French at GCSE and beyond. All the current exam board vocabulary is included and curriculum words are flagged with a key symbol. Word Tips provide information on common grammatical errors and confusable words, while interesting cultural information is specially picked out in Culture boxes. To support students building their range of vocabulary and get them using it confidently, all words are also given in appropriate example sentences so that students can see how to use them correctly. Extra grammar support is given with full verb tables, including English translations of the different tenses, to help with translating to and from French. In the centre of the dictionary, the illustrated thematic supplement includes questions, answers, comments and phrases and photocard activities to model those faced by students in their exams. It has a contemporary look and feel and covers topics such as technology, free-time activities, customs and festivals, social and global issues, travel and tourism, current and future study and employment.

With the intrigue of a psychological thriller, Camus's masterpiece gives us the story of an ordinary man unwittingly drawn into a senseless murder on an Algerian beach. Behind the intrigue, Camus explores what he termed "the nakedness of man faced with the absurd" and describes the condition of reckless alienation and spiritual exhaustion that characterized so much of twentieth-century life. First published in 1946; now in translation by Matthew Ward.

This workbook combines methodology and practice for beginning translators with a solid proficiency in French. It assumes a linguistic approach to the problems of translation and addresses common pitfalls, including the delineation of " translation units " , word polysemy, false cognates, and structural and cultural obstacles to literal translation. The first part of the book focuses on specific strategies used by professionals to counter these problems, including transposition, modulation, equivalence, and adaptation. The second part of the book provides a global application of the techniques taught in the opening sections, guiding the student through step-by-step translations of literary and non-literary excerpts. The revised edition clarifies some of the finer points of the translation techniques introduced in the first edition, provides extra practice exercises, and offers information on a website that can be used in class.

This dictionary deals with the little words which everyone uses every day without even noticing them and which are so liable to escape the grasp of a speaker of another language - clipped words, obtained by back-clipping or apocope (the dropping of one or more final syllables), by front-clipping or apharesis (the dropping of one or more initial syllables), by the combination of these two processes and sometimes further transformed, especially in slang, by the addition of a new ending. The aim is not of course merely to list all these words and say from which longer words they were obtained; an attempt is made here to retrace the history of each of them, its stylistic, semantic and often morphological evolution, to illustrate this with authentic and often pungent or humorous quotations and also to show how

each can be translated into the other language. Indeed this is an English-French bilingual dictionary, whose aim is to translate clipped words according to principles of historical and register fidelity which bilingual dictionaries do not ordinarily set for this type of headword. Thus, clipped words will be shown to have meaning precisely because they are clipped; consequently, this meaning must be preserved and conveyed in translation. This dictionary thus aims at being different from traditional bilingual dictionaries, dictionaries of slang and colloquialisms included, in the structure and content of its articles, in which much space is devoted to the lexicological data, which inform the strictly lexicographical information. Special attention and care have been devoted to the system of cross-references, the recording and presentation of derived forms, variants and compounds and to the presentation of slang or colloquial synonyms of the headwords. The body of the dictionary is preceded by a preface in which the editing principles and methods are outlined and an attempt is made at analyzing the corpus : its historical, sociological and morphological aspects are reviewed, together with the motivations of those that coin or use clippings. These motivations appear essential to the proper appraisal of this body of slang and colloquial words; this dictionary's intention is to pay homage to all the unknown people who have made the lexicon richer by playing with and on words, with joyful humour, zest and gusto. It is hoped that all lovers of words will have the same pleasure exploring this dictionary as its author had writing it. Professor Fabrice Antoine teaches English at the Universite Charles-de-Gaulle Lille III (France). His research fields are bilingual lexicography, lexicology and translation; he has been a consulting editor for a dozen bilingual dictionaries, general as well as slang ones. He is especially interested in French and English slang and colloquialisms and co-hairs ELEXTRA (Etudes sur le Lexique et la Traduction), a research centre at the University of Lille.

Originally published in 1893. PREFACE: This book has been compiled for the use of those who are satisfied that beginners in French should be exercised, from the first, both in reading connected French speech which has an import, and in imitating what has been read..... This early work is a comprehensive and informative look at the subject with much of the information still useful and practical today, and will appeal greatly to any student or teacher. Many of the earliest books, particularly those dating back to 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.
