As gang violence has become a prominent issue in Central America, understanding its root causes becomes critical to its reduction. This analysis seeks to examine the effects of economic growth and inequality on increasing gang violence in the democratic countries of Costa Rica, El Salvador and Nicaragua. Through the use of simple regressions the relationships between economic growth, inequality and gang violence were examined. The results found that inequality and economic growth were statistically correlated in all three countries. Although, there was positive correlation between inequality and economic growth in Costa Rica, and there was a negative relationship in El Salvador and Nicaragua. This negative or positive correlation was found to be the deciding factor on the type of effect that economic growth had on gang violence. Over sixty men were murdered, including the leader of the Winter Hill Gang, James "Buddy" McLean. The leadership of one of the most influential non-Italian crime organizations in the United States was inherited by his childhood friend, Howard T. "Howie" Winter. The events during Winter's tenure offer a true picture of an era in Boston's pre-WhiteyBulger history when the streets were protected by a close-knit group of Irish-Italian "businessmen." This story slices a layer

After decades of silence, three strong and very different females lift the Mob veil and voice their own struggle to survive in Somerville's criminal circle. Often painfully poignant and yet frequently hilarious, this is a microscopic view of a generation struggling to walk the moral tightrope between societal decency and the loyalty of criminality.
