These valves have a sharp gate that slices through thick slurries, wastewater, dry bulk solids, and other materials that would clog other gradual on/off valves. They bolt to flanges and gradually open and close to prevent system damage from suddenly starting and stopping flow. The wheel handle opens and closes the valve with multiple turns, providing controlled, shock-resistant flow.

On most RV black tank and grey tank drain assemblies, there are usually just two manufacturers of waste gate valves, Valterra and Bristol. Although they are very close dimensionally, they are not interchangeable. They will bolt up but not seal correctly so if you have a Valterra valve assembly you need to get the Valterra Slip Flange.
