The cloud cover had finally begun to clear after 8 days and nights. It was time for action. Both the Allies and the German forces had prepared for what was coming. It was likely to be the turning point of the air battle over Europe. Like most other airmen on both sides of the war, we knew how important our mission was this day. It could very well be the beginning of the end for the Nazi air forces, or it could set back our surge into Germany many months. Such was the mindset of most every member of the air group as we set our sights on the beginning of the most ambitious air assault ever. We were all nervous and afraid yet anxious to take off and do what we had trained for so long. Our ship was brand new and had been tested over and over for any possibility of malfunction. We were ready and so was our ship. Then, the unthinkable happened... The events which followed, set the stage for one of the most mysterious happenings of that day. It was to haunt everyone in the crew for the rest of their lives and change the course of history for all on board.

There are events witnessed in that half-way region between heaven and earth that defy all rational explanation. For years, author and pilot Martin Caidin collected these strange but true stories of aerial hauntings from experienced pilots and astronauts. His startling conclusion: Something is out there!

crash, featuring a new introduction by the author “ In straightforward, staggeringly honest prose, Nando Parrado tells us what it took—and what it actually felt like—to survive high in the Andes for seventy-two days after having been given up for dead. ” —Jon Krakauer, author of Into the Wild “ In the first hours there was nothing, no fear or sadness, just a black and perfect silence. ” Nando Parrado was unconscious for three days before he woke to discover that the plane carrying his rugby team to Chile had crashed deep in the Andes, killing many of his teammates, his mother, and his sister. Stranded with the few remaining survivors on a lifeless glacier and thinking constantly of his father ’ s grief, Parrado resolved that he could not simply wait to die. So Parrado, an ordinary young man with no particular disposition for leadership or heroism, led an expedition up the treacherous slopes of a snowcapped mountain and across forty-five miles of frozen wilderness in an attempt to save his friends ’ lives as well as his own. Decades after the disaster, Parrado tells his story with remarkable candor and depth of feeling. Miracle in the Andes, a first-person account of the crash and its aftermath, is more than a riveting tale of true-life adventure; it is a revealing look at life at the edge of death and a meditation on the limitless redemptive power of love.

Meet Blackwater USA, the private army that the US government has quietly hired to operate in international war zones and on American soil. Its contacts run from military and intelligence agencies to the upper echelons of the White House; it has a military base, a fleet of aircraft and 20,000 troops, but since September 2007 the firm has been hit by a series of scandals that, far from damaging the company, have led to an unprecedented period of expansion. This revised and updated edition includes Scahill's continued investigative work into one of the outrages of our time: the privatisation of war.

Whew—what an utterly compelling and deeply satisfying read!” —Simon Winchester, author of Atlantic Award-winning former Boston Globe reporter Mitchell Zuckoff unleashes the exhilarating, untold story of an extraordinary World War II rescue mission, where a plane crash in the South Pacific plunged a trio of U.S. military personnel into a land that time forgot. the seventieth anniversary of the agency ' s founding During his first visit to Langley, the CIA ' s Virginia headquarters, President Donald Trump told those gathered, " I am so behind you . . . there ' s nobody I respect more, " hinting that he was going to put more CIA operations officers into the field so the CIA could smite its enemies ever more forcefully. But while Trump was making these promises, behind the scenes the CIA was still reeling from blowback from the very tactics that Trump touted—including secret overseas prisons and torture—that it had resorted to a decade earlier during President George W. Bush ' s war on terror. Under the latest regime it seemed that the CIA was doomed to repeat its past failures rather than put its house in order. *The Ghosts of Langley* is a provocative and panoramic new history of the Central Intelligence Agency that relates the agency ' s current predicament to its founding and earlier years, telling the story of the agency through the eyes of key figures in CIA history, including some of its most troubling covert actions around the world. It reveals how the agency, over seven decades, has resisted government accountability, going rogue in a series of highly questionable ventures that reach their apotheosis with the secret overseas prisons and torture programs of the war on terror. Drawing on mountains of newly declassified documents, the celebrated historian of national intelligence John Prados throws fresh light on classic agency operations from Poland to Hungary, from Indonesia to Iran-Contra, and from the Bay of Pigs to Guantánamo Bay. The halls of Langley, Prados persuasively argues, echo with the footsteps of past spymasters, to the extent that it resembles a haunted house. Indeed, every day that the militarization of the CIA increases, the agency drifts further away from classic arts of espionage and intelligence analysis—and its original mission, while pushing dangerously beyond accountability. *The Ghosts of Langley* will be essential reading for anyone who cares about the next phase of American history—and the CIA ' s evolution—as its past informs its future and a president of impulsive character prods the agency toward new scandals and failures.

After their mother dies in a plane crash, ten-year-old Christina and her twin brother move with their father to a seemingly haunted house in a strange neighborhood.
