Since glaucoma is associated with advancing age, the number of patients requiring management of the condition is rising as life expectancy increases.<sup>4</sup> Early identification and referral of patients with ophthalmic pathology, and prompt secondary-care response facilitates timely management with the aim of limiting visual disability.<sup>3, 5, 6</sup>

SIGN 144 • Glaucoma referral and safe discharge

Management of ocular hypertension (OH), suspected primary open angle glaucoma (POAG), and confirmed POAG are normally under the direction of an ophthalmologist. No treatment is required for some people with mild OH but they require monitoring by an optometrist who may refer to an ophthalmologist for treatment, when appropriate.

Scenario: Primary open angle glaucoma and intraocular ...

The management of chronic primary angle closure suspect (PACS), chronic primary angle closure (PAC), and chronic primary angle closure glaucoma (PACG) are similar. Treatment options are similar to the definitive treatment of acute angle closure described above.

stop these conditions progressing.

This book offers optometrists a complete, clinically oriented guide to effective diagnosis and management of glaucoma and provides valuable assistance in co-managing these patients with ophthalmologists. Coverage of diagnosis includes risk factors, genetic factors, gonioscopy, visual field analysis, intra-ocular pressure measurement, corneal thickness evaluation, and optic nerve imaging. The medical management section thoroughly describes the ophthalmic drugs used to manage glaucoma. The surgical management section describes laser and conventional procedures and offers optometrists guidelines for co-managing patients. The final section presents case studies. Chapters include clinical pearls and "how-to" instructions for procedures. Over 100 illustrations complement the text.

Glaucoma is an eye disease in which the optic nerve is damaged and can permanently damage vision and lead to blindness if left untreated. This book is a complete guide to the diagnosis and management of glaucoma. Divided into five sections, it begins with an introduction to the disease, continuing step by step through its diagnosis, the different types of glaucoma and treatment options. Authored by specialists renowned in their field based in India and the USA, this manual contains 840 images and illustrations.

# Read Book Glaucoma Diagnosis And Management

Abstract: Glaucoma is a devastating disease, causing significant loss of independence and diminished quality of life for millions of people. Glaucoma is a major public health problem in the United States, and blindness from glaucoma is believed to impose significant costs annually on the federal government in Social Security benefits, lost tax revenues, and health care expenditures [1]. The following project involves the Healthy People 2010 objective 28-6 of preventing vision loss due to glaucoma, and focuses on our community of optometrists to effectively diminish glaucomatous vision loss. The project objectives are as follows: evaluate current glaucoma treatment standards in Ohio, assess "best practice" glaucoma standards and encourage implementation, develop glaucoma management tools for optometrists, and ultimately, prevent vision loss. There are 1800 licensed optometrists in Ohio, of which 1200 are Ohio Optometric Association (OOA) members. A survey was administered by mail to 600 randomly selected member doctors. Additionally, attendees of the 2005 American Optometric Association (AOA) conference were selected to be surveyed. Surveys were passed out at a glaucoma course, a primary care course, and one course on dry eye. There were 90 surveys collected in total from the AOA conference. The surveys were then statistically analyzed. Focus groups were also organized to obtain optometrists' opinions on glaucoma management and potential tools to be used in patient education. The total number of surveys collected was 290. Answers were tabulated, and it was found that the survey respondents manage  $142 \pm 275$  glaucoma patients on average, with a median of 50 and a range of 3 to 2200. Glaucoma screening tests were in concordance with professional guidelines, from both the American Optometric Association (AOA) and the American Academy of Ophthalmology (AAO). Measurement of intraocular pressure and stereoscopic appearance of the optic nerve head were found to be done by almost every optometrist surveyed. Fundus photography was only found to be used 20% of the time. Visual field testing is used 75% of the time in screening for glaucoma, and 90% of the time in managing glaucoma by our survey respondents; it is possible that imaging is

# Read Book Glaucoma Diagnosis And Management

taking over as a final tool in making the glaucoma diagnosis and managing it as well. Pachymetry is currently valued as part of the standard of care, thanks to recent research. Prostaglandins are found to be the first choice in medication in treating glaucoma. Focus groups were found to agree that standard of care is proper patient management to the highest level, more widespread education is needed, and that public screenings may soon be necessary to find those at risk and those with glaucoma. Although not many studies have been done on evaluating how and if optometrists are meeting the standard of care, or "best practice" as outlined by professional eye care organizations, this project provides insight into the realm of care in glaucoma diagnosis and management. Optometrists in Ohio are following clinical care guidelines in the majority of recommendations by both the AOA and the AAO. However, there does exist various shortfalls in diagnosis and management, and the need for further education of the general public. The standard of care in glaucoma is a dynamic body that must be continually re-evaluated and revised in order to provide the best care to patients.

A guidebook on the specifics of glaucoma, based on the author's clinical experiences, which outlines the various approaches to management and treatment. Sections of the book address diagnosis, pathology and management, as well as examining the latest advances and improvements in the field.
