Simo Häyhä (1905 - 2002) is the most famous sniper in the world. During the Winter War fought between Russia and Finland in 1939 - 1940 he had 542 confirmed kills with iron sights, a record that still stands today. He has been a role model for snipers all over the world and paved the way for them by demonstrating their significance on the battlefield.Simo Häyhä was a man of action who spoke very little, but he was hugely respected by his men and his superiors and given many difficult missions, including taking out specific targets. Able to move silently and swiftly through the landscape, melting into the snowbound surroundings in his white camouflage fatigues, his aim was deadly and his quarry rarely escaped. The Russians learned of his reputation as a marksman and tried several times to kill him by indirect fire. He was promoted from corporal to second lieutenant and he was awarded the Cross of Kollaa. For sniping Simo Häyhä only ever used his own m/28-30 rifle. Eventually his luck ran out and Simo received a serious head wound on March 6 1940, though he subsequently recovered.After the war Simo Häyhä lead a quiet, unassuming life in farming and forestry. His roots were deep in the Finnish soil and he loved life in rural Finland. A true patriot, he epitomized the traits of a professional soldier, performing his duty and setting an example of bravery that personified the Finnish spirit when confronted by the Russian onslaught.The White Sniper fully explores Simo Häyhä's life, his exploits in the Winter War, the secrets behind his success including character and technique, and also includes a detailed look at his rifle itself. There are appendices on the basics of shooting, the impact of fire on the battlefield, battles on the Kollaa Front during the Winter War and a list of ranked snipers of the world.

Snipers are exceptional. The trained sniper is a complex fusion of hard skills such as weapons knowledge, situational awareness, knowledge of ballistics and physics, and soft skills such as emotional stability, empathy, and a stoic acceptance of the hardships associated with a particular set of circumstances. There are countless instances where a single sniper, embarking on a secret mission, would have to improvise, operate beyond any hope of support, and yet still manage to carry out the mission and get back home unharmed even though the enemy was actively hunting him. For the first time ever, The Sniper Mind reveals the practical steps that allow a sniper's brain to work in this superhuman precise, calculated way. It teaches readers how to understand and apply these steps, whether they are stuck in a cubicle facing mounting piles of work or sitting in a corner office making industry-defining decisions. Through the explanation of advanced military training techniques and cutting-edge neuroscience, David Amerland's book provides concrete strategies and real-world skills that can help us be better: -At our jobs -In our relationships -In our executive decision making -In the paths we choose to take through life By learning how snipers teach their minds to eliminate fears and deal with uncertainty we can also develop the mental toughness we need to achieve the goals that seem to elude us in business as well as in life.
