place. Choking gas exploded from volcanoes and oceans of lava bubbled around the globe... Then in the deep, dark ocean, something amazing happened. This is an exciting and dramatic story about how life began and developed on Planet Earth, written especially for younger children. The authors explain how the first living cell was created, and how the cells multiply and create jellyfish and worms, and then fish with bendy necks, which drag themselves out of the water into swampy forests. They tell the story of the biggest creatures that have ever walked on land - the dinosaurs. Long after that, hairy creatures who have babies, not eggs, take over, stand on two legs and spread around the world, some of them living through cataclysmic events such as ice ages and volcanic eruptions. Everyone living today is related

This endearing friendship story about a boy and his dog from a Pulitzer Prize–winning writer gently explores a timeless question: who 's really in charge? Meet Sid. He 's an ordinary kid. He 's far from perfect. But to Murphy, Sid 's faithful dog, Sid is the whole world. Murphy thinks Sid is the absolute best—and that he 's in charge of everything. Sid loves Murphy right back, but he can 't help but wonder what Murphy would think if he realized the truth: Sid 's just a kid, and Murphy 's just a dog, and neither one can control the world. This deceptively simply picture book is the perfect start to a discussion about a subject seldom seen in children 's books—the nonthreatening feel of a world based on fact and reason, and not faith.
