Housing Benefit or Local Housing Allowance (LHA) - rates, eligibility, claim form, calculator, appeals, 'discretionary payments'

This wide-ranging exploration of the key contemporary relationships between social change and housing is both policy-oriented and theoretical, drawing on a group of internationally-respected academics. It is also multidisciplinary, incorporating sociology, economics, social policy and human geography perspective. Its international perspective is rooted in its examination of issues such as economic insecurity and instability, social diversity, financial and social exclusion, sustainability, privatisation and state legitimacy, the interaction of the global and the local across three continents.

Economic reform in China has resulted in a widening gap between the rich and the poor, and urban poverty has emerged as a key factor which may affect future development. This new book examines the poverty problem in relation to housing and social changes in large inland cities, and assesses the effectiveness of recent government anti-poverty policies. The book also puts the Chinese experience in the wider context of transitional economies and discusses the similarities and differences between China and Central and Eastern European countries. The book is based on a long period of research on Chinese urban development, and benefited from several research projects conducted in Chinese cities. It is an important reference for all of those interested in housing, urban studies and social change, and is a key text for students of the Chinese economy and society.

The aim of this book is to provide a benchmark statement of key issues on housing and to emphasise the need to embed our understanding of housing issues in an international and multidisciplinary setting.

Dramatic socio-economic transformations over the last two decades have brought social policy and social welfare issues to prominence in many East Asian societies. Since the 1990s and in response to national as well as global pressure, there have been substantial developments and reforms in social policy in the region but the development paths have been uneven. Until recently, comparative analysis of East Asian social policy tends to have focused on the established welfare state of Japan and the emerging welfare regimes of four Tiger Economies. Much of the recent debate indeed preceded China's re-emergence onto the world economy. In this context, this Handbook brings China more fully into the contemporary social policy debates in East Asia. Organised around five themes from welfare state developments, to theories and methodologies, to current social policy issues, the Handbook presents original research from leading specialists in the fields, and provides a fresh and updated perspective to the study of social policy. Providing a comparative international approach, this Handbook will appeal to academics, researchers and students at both undergraduate and postgraduate levels working in the fields of social policy, as well as policy makers and practitioners who are interested in social policy lessons from other societies.

Social Policy and Change in East Asia examines the current state of social policy and social development in East Asia and argues that these two domains should be integrated in order to improve social welfare. This book distinguishes itself by avoiding a Eurocentric approach to social policy analysis, focusing instead on the relationship between institution and development.

Locating Neoliberalism in East Asia: Neoliberalizing Spaces in Developmental States examines the influence of neo-liberal ideologies on urban and regional policies and practices in several Asian Pacific nations. Represents one of the few studies of neoliberal changes in East Asia, one of the most important topics in social science research over the past two decades Considers the Asian perspective by focusing on readings from Asian experts Pays special attention to the ' spatial' dimension of the East Asian neoliberalization Examines the influence of neo-liberal ideologies on urban and regional policies and practices in several Asian Pacific nations Explores the evolving relationship between the two political economies

Housing policy has been central to the economic success stories of the major East Asian economies as well as a pillar of social and welfare provision. This book explores not only the development of their distinctive approach, but also the challenges posed in recent years, and currently, by rapid socio-economic and demographic change.

As oil-rich countries in the Middle East are increasingly associated with soaring skyscrapers and modern architecture, attention is being diverted away from the pervasive struggles of social housing in those same urban settings. Social Housing in the Middle East traces the history of social housing—both gleaming postmodern projects and bare-bones urban housing structures—in an effort to provide a wider understanding of marginalized spaces and their impact on identities, communities, and class. While architects may have envisioned utopian or futuristic experiments, these buildings were often constructed with the knowledge and skill sets of local workers, and the housing was in turn adapted to suit the modern needs of residents. This tension between local needs and

national aspirations are linked to issues of global importance, including security, migration, and refugee resettlement. The essays collected here consider how culture, faith, and politics influenced the solutions offered by social housing; they provide an insightful look at how social housing has evolved since the 19th century and how it will need to adapt to suit the 21st.

Bringing together a number of perspectives on the Japanese housing system, *Housing and Social Transition in Japan* provides a comprehensive, challenging and theoretically developed account of the dynamic role of the housing system during a period of unprecedented social and economic change in one of the most enigmatic social, political, and economic systems of the modern world. While Japan demonstrates many of the characteristics of some western housing and social systems, including mass homeownership and consumption-based lifestyles, extensive economic growth and rapid urban modernization has been achieved in balance with traditional social values and the maintenance of the family system. Helpfully divided into three sections, *Housing and Social Transition in Japan*: explores the dynamics of the development of the housing system in post-war Japan deals with social issues related to housing in terms of social aging, family relations, gender and inequality addresses the Japanese housing system and social change in relation to comparative and theoretical frameworks. As well as providing challenges and insights for the academic community at large, this book also provides a good introduction to the study of Japan and its housing, economic, social and welfare system generally.

This book looks at the role of social policy and particularly social security in addressing the ongoing challenge of poverty in East Asia despite the region ' s spectacular experience of economic growth in decent decades. The East Asian miracle resulted over the last four decades in a transformation of the region ' s traditional agrarian economies and significant increases in standards of living for many ordinary people. Even though it was given little attention, poverty has remained an ongoing problem. The problem became particularly evident however with the Asian financial crisis of 1997 when many low income and middle class workers became unemployed. As a result of this crisis, the need for effective social policies and social security programs were recognized. The idea that economic growth would solve the problem of poverty was increasingly challenged. Even in China today, where rapid growth has created new employment opportunities and the promise of prosperity for many, the government has recognized that the problem of poverty cannot be addressed only through economic growth but that comprehensive social policies must be formulated, and this includes the development of an effective security system.
