Using this, and other administrative data, Lesley McAra and Susan McVie argue that systems of youth and adult justice, far from tackling violence and lifting young people out of poverty, serve instead to entrench them in it. Since poverty is a strong driver of violent offending amongst young people, this reproduces the very

Juvenile Delinquency: Why Do Youths Commit Crime? focuses on why juveniles commit crime. It includes discussions on what constitutes criminal behavior by juveniles, the general theories on delinquency, and discussions that tie the theories with real life situations. The book

opens the students' eyes to the fascinating concepts involving juvenile delinquency, and is designed to provide a complete study of the behavior, beliefs, conditions, and reactions to deviance by young offenders. Throughout Cliff Roberson and Elena Azaola gives students a detailed discussion of and what constitutes juvenile

delinquency to allow for better understanding of this phenomenon. In each of the chapters, the authors encourage the student to develop new insights on criminal behavior of juveniles. The book makes the subject come alive by the generous use of “down to earth” examples of the issues involved in the area. While

Throughout history the media has primarily been produced by adults, for adults, about adults. Increasingly, children

have become a matter of high priority in the modern media society, and as they have, they have also become the subject of much concern. From debates in Congress about the detrimental effects of movies, comic books, and video games over the last century to efforts to court children as media consumers, there is a clear

recognition that the media are not now and probably never were purely adult fare. Their impact on children is at issue.

Beginning with Etan Patz's disappearance in Manhattan in 1979, a spate of high-

profile cases of missing and murdered children stoked anxieties about the threats of child kidnapping and exploitation. Publicized through an emerging twenty-four-hour news cycle, these cases supplied evidence of what some commentators dubbed "a national epidemic" of child abductions committed by "strangers." In

this book, Paul M. Renfro narrates how the bereaved parents of missing and slain children turned their grief into a mass movement and, alongside journalists and policymakers from both major political parties, propelled a moral panic. Leveraging larger cultural fears concerning familial and national decline,

these child safety crusaders warned Americans of a supposedly widespread and worsening child kidnapping threat, erroneously claiming that as many as fifty thousand American children fell victim to stranger abductions annually. The actual figure was (and remains) between one hundred and three hundred, and

kidnappings perpetrated by family members and acquaintances occur far more frequently. Yet such exaggerated statistics-and the emotionally resonant images and narratives deployed behind them-led to the creation of new legal and cultural instruments designed to keep children safe and to punish the "strangers"

who ostensibly wished them harm.

Ranging from extensive child fingerprinting drives to the milk carton campaign, from the AMBER Alerts that periodically rattle Americans' smart phones to the nation's sprawling system of sex offender registration, these instruments have widened the reach of the

carceral state and intensified surveillance practices focused on children. Stranger Danger reveals the transformative power of this moral panic on American politics and culture, showing how ideas and images of endangered childhood helped build a more punitive American state.

Have faith. End hunger. Ending hunger is a moral imperative that does not stand alone. Hunger thrives on the racial, social, and economic inequalities that are eating away at the soul of our nation and pulling us apart. But ending hunger could now become the cause that brings us together across partisan lines to make our economy

include everyone and work for everybody. The goal of ending hunger nationwide is not only noble but easily within reach. Taking up this goal could give us a corrective lens, a lens of hope for seeing ourselves and our country in a new way. It could also give us better vision for helping the world overcome extreme hunger and

poverty. Our failure to speak and write to members of Congress about hunger consigns millions of people here and abroad to diminished lives and premature death, so it is a silence that kills. We can break that silence by urging the nation's leaders to help end hunger and humanize our economy. This book addresses all

people of goodwill, including agnostics and atheists, but with a special word of concern for religious people—Christians in particular—who help through charity, but neglect to use the power of their citizenship against hunger.

Throughout her entire career, Judge Polier

continually fought for the rights and needs of the poor. In this volume she describes the granting and denial of justice toward the poor -- particularly poor children -- she observed during her tenure as a Family Court Judge in New York City. The book discusses the current state of the justice system and the outlook for the future. This

volume helps readers understand how broadly shared the responsibility for the neglect of today's youth is and how society must reshape its attitudes and realign its priorities to help the thousands of children who are dependent upon the public for care and support. The book identifies how the courts have been weakened by their

In 2003, when Terrence Graham was sixteen, he and three other teens attempted to rob a barbeque restaurant in Jacksonville, Florida. Though they left with no money, and no one was seriously injured, Terrence was sentenced to die in

prison for his involvement in that crime.

As shocking as Terrence's sentence sounds, it is merely a symptom of contemporary American juvenile justice practices. In the United States, adolescents are routinely transferred out of juvenile court and into adult criminal court without any judicial oversight. Once in adult court,

children can be sentenced without regard for their youth. Juveniles are housed in adult correctional facilities, they may be held in solitary confinement, and they experience the highest rates of sexual and physical assault among inmates. Until 2005, children convicted in America's courts were subject to the death penalty;

today, they still may be sentenced to die in prison-no matter what efforts they make to rehabilitate themselves. America has waged a war on kids. In *The War on Kids*, Cara Drinan reveals how the United States went from being a pioneer to an international pariah in its juvenile sentencing practices. Academics and

journalists have long recognized the failings of juvenile justice practices in this country and have called for change.

Despite the uncertain political climate, there is hope that recent Supreme Court decisions may finally make those calls a reality. The War on Kids seizes upon this moment of judicial and political

recognition that children are different in the eyes of the law. Drinan chronicles the shortcomings of juvenile justice by drawing upon social science, legal decisions, and first-hand correspondence with Terrence and others like him—individuals whose adolescent errors have cost them their lives. At the same time,
