This textbook offers an introductory overview of eight hotly-debated topics in second language acquisition research. It offers a glimpse of how SLA researchers have tried to answer common questions about second language acquisition rather than being a comprehensive introduction to SLA research. Each chapter comprises an introductory discussion of the issues involved and suggestions for further reading and study. The reader is asked to consider the issues based on their own experiences, thus allowing them to compare their own intuitions and experiences with established research findings and gain an understanding of

'Language attrition' describes the loss of, or changes to, grammatical and other features of a language as a result of declining use by speakers who have changed their linguistic environment and language habits. In such a situation there may, for example, be simplification in the tense system or in certain properties of subordinate clauses; some vocabulary items might fall into disuse and phonetic features may be restructured. These changes can be

affected by features of the speaker's environment, but also by his or her attitudes and processes of identification. This book provides a detailed and up-to-date introduction to the way in which language attrition can affect language, as well as to the extra- and sociolinguistic features involved. It also familiarizes the reader with experimental approaches to attrition and data analysis techniques and provides hands-on guidelines on how to apply them.

Examines the challenges of learning both language and content in the same class, and reviews classroom-based research on instructional practices that can meet those challenges in primary and secondary schools.

Inquiry into the nature and purpose of language has long been a

central concern of Western philosophy, within both the analytic, Anglo-American tradition, and its Continental counterpart.

Language: Key Concepts in Philosophy explains and explores the principal ideas, theories and debates in the philosophy of language, providing a clear and authoritative account of the discipline. The text covers the work on language of the major philosophers in both traditions, including Frege, Wittgenstein, Austin, Quine, Davidson, Heidegger, Gadamer, Derrida and Butler. The book equips readers with the requisite philosophical tools to get to grips with central concepts and key issues, and raises challenging questions students can then explore on their own. Coverage of each issue provides the reader with a full account of the state of the question and a thorough assessment of the arguments entailed in the available literature on that subject. Philosophy undergraduates will find this an invaluable
