First published in 2009. Routledge is an imprint of Taylor & Francis, an informa company.

Includes section, "Recent book acquisitions" (varies: Recent United States publications) formerly published separately by the U.S. Army Medical Library.

In *With Eyes and Ears Open: The Role of Visitors in the Society of Jesus*, twelve historians examine important visitations in the history of the Society. After a thorough investigation of the nature and role of the "visitor" in Jesuit rules and regulations, ten visitations of missions and provinces are considered.

This collection discusses the concept of fraternity and examines the issue of its role in law. Since the end of World War II, fraternity has been cited in several national constitutional charters, in addition to the United Nations Universal Declaration of Human Rights. But is there space for fraternity in law? The contributions to this book form an ideal "bridge" between the past and present to trace the different pathways taken to address the meaning of fraternity, and to identify its possible legal relevance. The book lays out paths that have placed fraternity in varied and challenging legal contexts in an age of globalization and conflict, where the multiplicity of national and supranational sources of law seems to show its inadequacy to govern complexity, and coexistence between diversities that appear irreconcilable. The purpose is not to recover fraternity as a forgotten principle, but to reimagine it today to address the aim and force of law within a plurality of cultures. The analysis considers a possible universal dimension that models unity within diversity, and aspires to serve as a prologue to a transition from research to dialogue between different legal systems and traditions. The book will be of interest to academics and researchers working in the areas of Comparative Law, Legal History and Legal Philosophy.

The objective of this study is to identify and explore the role of intellectual property rights in sharing the benefits arising from the use of biological resources and associated traditional knowledge. It was commissioned in response to Decision IV/9 of the Conference of the Parties to the Conventional on Biological Diversity, and highlights the need, when genetic resources are first accessed, for a understanding of intellectual property issues, as they relate to traditional knowledge of biological resources.
