understanding and meaning. This new edition is fully updated to include examples of new technologies and is suitable for use in a range of international educational contexts. It also includes a brand new chapter on blending Structured Teaching.

Combining their years of experience working with individuals on the autism spectrum, both here and around the world, authors Vera Bernard-Opitz and Anne Häußler bring teachers and other professionals practical ideas and teaching methods for offering visual supports to students with autism spectrum disorders and other visual learners. With hundreds of colorful illustrations and step-by-step directions, this book lays the foundation for how to structure teaching environments, as well as offers countless examples of activities for students, ranging from basic skills, to reading and math, to social behavior.

"This resource provides special education teachers, therapists, parents, and home-based therapists with practical, easy-to-implement ideas for creating over 80 work tasks or boxes to be used to teach students to work independently and for an established length of time. This book contains classroom and home-tested ideas for addressing skills in six different areas: sorting, matching, reading, writing, mathematics, and motor tasks."--The back cover.

A revised edition of the 2008 instructor's manual which accompanies the textbook by the same name. Includes chapter highlights, recommendations for in-class and extension activities and project ideas. Chapter PowerPoint presentations, chapter tests and a comprehensive exam are available for download from the AAPC Publishing website.--Publisher.

This curriculum uses the proven principles of applied behavior analysis (ABA) as a way to monitor the progress of children on the autism spectrum and make sure they reach their full potential. It gives adults a clear outline on what to teach and how to teach it, in order to ensure children are reaching developmental goals at this crucial stage. The book's three sections, Assessment, Curriculum and Mastered, each include built-in data collection, which is reproduced on the accompanying online downloadable content so it can be printed off. All three sections cover ten pivotal areas of progress for this age group, including reading, writing, math, conversation and social skills. The Assessment section records the child's initial level of learning and then tracks their progress over time. The Curriculum section provides the lesson plans for the skills which need to be developed, and the Mastered section is a tool for checking that learnt skills are being retained over time. It is also possible to record whether the child has adapted to using the skills in a variety of settings. This curriculum provides everything that an adult working with a child with an autism spectrum disorder would need to ensure a thorough and
