stick in the spokes of your routine. It's not the soft-hearted kind of book that's interested in what you have to say; rather it contains 365 daily orders, each one of which could turn your humdrum existence into a daily free-fall. Whether learning to tell one joke properly, spending an hour talking to a tree, or choosing a motto to live by, This Book Will Change Your Life will lead you to make every day of the next year the first day of your new life.

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller Made to Stick.

Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that

compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping
- The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service

In a compelling, story-driven narrative, the

Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. Switch shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

100 EXPERIMENTS TO CHANGE YOUR LIFE Ralph Waldo Emerson once said "All life is an experiment. The more experiments you make the better." Many of us spend our days as if we are going to live forever. We dream about things we never do. We think about things we never say. We sit and hope and expect things to fall into our lap but guess what? They never do. If you want something you have never had, you have to do something you have never done

before. If you truly want to achieve a goal or a dream you will find a way. If you don't, you will find an excuse. This book is a compilation of 100 life experiments or what can also be considered to be a bunch of dares. I dare you to do them all to prove you are awake and alive in this world. These life experiments are going to force you to get outside your comfort zone. You will need to get over your fears, try something different, stand up for yourself and learn how to have fun again. Ultimately it is going to be up to you. Are you ready to take action? Don't be afraid to fail. Be afraid not to try. It's time to remember what it feels like to be alive again. To live is the rarest thing in the world. Most people just exist. Oscar Wilde

"A critical read for any leader to understand our changing times."
