Life Orientation Grade 12 Teacher Guide. Life Orientation is one of the four fundamental subjects within the seven subject package that learners must offer to qualify for the National Senior Certificate (NSC). Of the 29 subjects of the National Curriculum Statement (NCS), Life Orientation is the only subject that is not externally assessed in Grade 12. It is the only subject that is 100% internally assessed for certification purposes.

This book is designed to help practitioners and academics to assess the added value of HR practices. It provides hands-on recommendations for choosing effective means to manage HR and specific suggestions aimed at facilitating the measurement of HR practices' impact on value creation. Evidence-based recommendations are made by drawing on thorough empirical research from various research traditions and academic disciplines. It covers a wide variety of tasks faced by the HR function and specifically addresses new challenges such as assessing the added value of work-life balance practices.

The general theme of MEDICON 2013 is "Research and Development of Technology for Sustainable Healthcare". This decade is being characterized by the appearance and use of emergent technologies under development. This situation has produced a tremendous impact on Medicine and Biology from which it is expected an unparalleled evolution in these disciplines towards novel concept and practices. The

consequence will be a significant improvement in health care and well-fare, i.e. the shift from a reactive medicine to a preventive medicine. This shift implies that the citizen will play an important role in the healthcare delivery process, what requires a comprehensive and personalized assistance. In this context, society will meet emerging media, incorporated to all objects, capable of providing a seamless, adaptive, anticipatory, unobtrusive and pervasive assistance. The challenge will be to remove current barriers related to the lack of knowledge required to produce new opportunities for all the society, while new paradigms are created for this inclusive society to be socially and economically sustainable, and respectful with the environment. In this way, these proceedings focus on the convergence of biomedical engineering topics ranging from formalized theory through experimental science and technological development to practical clinical applications.

It is only recently that transgenderism has been accepted as a disorder for which treatment is available. In the 1990s, a political movement of transgender activism coalesced to campaign for transgender rights. Considerable social, political and legal changes are occurring in response and there is increasing acceptance by governments and many other organisations and actors of the legitimacy of these rights. This provocative and controversial book explores the consequences of these changes and offers a feminist perspective on the ideology and practice of transgenderism, which the author sees as harmful. It explores the effects of transgenderism on the lesbian and gay community, the partners of people who transgender, children who are identified as transgender and the people who transgender themselves, and argues that these are negative. In doing so the book contends that the phenomenon is based upon sex stereotyping, referred to as 'gender' - a conservative ideology that forms the foundation for women's subordination. Gender Hurts argues for the abolition of 'gender', which would remove the rationale for transgenderism. This book will be of interest to scholars and students of political science, feminism and feminist theory and gender studies.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

The study analyses the provisions of article 10 of the European Convention of Human Rights, which protects freedom of expression, in the context of the Internet society. Recent landmark ECHR and ECJ judgments, useful to explain the peculiar mechanism of protection of freedom of expression in the field, are examined in the text. A special attention is given to the ECHR Grand Chamber *Delfi v. Estonia* judgment, delivered in 2015, which clearly set the position of the Information service providers, their powers and duties to filter and block illegal data, and their responsibility for defamation brought by Internet users.

Modern presidents are CEOs with broad powers over the federal government. The United States Constitution lays out three hypothetically equal branches of government—the executive, the legislative, and the judicial—but over the years, the president, as head of the executive branch, has emerged as the usually dominant political and administrative force at the federal level. In fact, Daniel Gitterman tells us, the president is, effectively, the CEO of an enormous federal bureaucracy. Using the unique legal authority delegated by thousands of laws, the ability to issue executive orders, and the capacity to shape how federal agencies write and enforce rules, the president calls the shots as to how the government is run on a daily basis. Modern presidents have, for example, used the power of the purchaser to require federal contractors to pay a minimum wage and to prohibit contracting with companies and contractors that knowingly employ unauthorized alien workers. Presidents and their staffs use specific tools, including executive orders and memoranda to agency heads, as instruments of control and influence over the government and the private sector. For more than a century, they have used these tools without violating the separation of powers. *Calling the Shots* demonstrates how each of these executive powers is a powerful weapon of coercion and redistribution in the president's political and policymaking arsenal.

This is a guide to recommended practices for crime scene investigation. The guide is presented in five major sections, with sub-sections as noted: (1) Arriving at the Scene: Initial Response/Prioritization of Efforts (receipt of information, safety procedures, emergency care, secure and control persons at the scene, boundaries, turn over control of the scene and brief investigator/s in charge, document actions and observations); (2) Preliminary Documentation and Evaluation of the Scene (scene assessment, "walk-through" and initial documentation); (3) Processing the Scene (team composition, contamination control, documentation and prioritize, collect, preserve, inventory, package, transport, and submit evidence); (4) Completing and Recording the Crime Scene Investigation (establish debriefing team, perform final survey, document the scene); and (5) Crime Scene Equipment (initial responding officers, investigator/evidence technician, evidence collection kits).

These proceedings represent the work of researchers participating in the 6th International Conference on Innovation and Entrepreneurship (ICIE 2018) which is being co-hosted by Georgetown University and George Washington University and is being held at The University of the District of Columbia (UDC) on 5-6 March 2018.

Elite youth sport competitions have increased significantly in number in recent years, with the Youth Olympic Games representing the high point of this phenomenon. This book examines the global context within which elite youth sport has emerged and continues to grow. It explores elite youth sport policy across fifteen countries, in Europe, the Americas, Africa and Asia, addressing the questions of how youth talent development is organised and why elite youth sport has become so popular. Taking a comparative global perspective, the book analyses the growth in more systematic approaches to young athlete development and the increasing emphasis on early talent identification. It discusses the attitude of stakeholders (such as NGBs, governments and sponsors) towards elite youth sport, while also considering how young elite athletes' interests are protected and how the growth in elite youth sport affects a sport's development strategy. Written by a team of internationally renowned researchers, *Elite Youth Sport Policy and Management: A comparative analysis* is fascinating reading for all students, scholars, managers, policy-makers and coaches with an interest in youth sport, elite sport development, talent identification and sports policy.
