curriculum, the purpose of the book is to help anglers learn how to achieve more and know where to get assistance. Many of the skills at the highest levels of fly-casting require an educated sense of feeling in the rod hand that enables the caster to use finesse and seemingly minimal effort to manipulate the rod and line. The book will guide people down the path of acquiring that magical touch. According to Field's philosophy, readers should first learn all casting styles and techniques to adapt them for any species and location they encounter, and secondly, they should know the history and purpose of presentation, so they can be innovative in the future. In applying this book to angling, he's not trying to teach the reader how to catch more fish; he's trying to help the reader catch the fish he or she wants.
